Social Change Through Voluntary Action:

Leisure, Voluntary Action and Social Change in Britain, 1880-1939 Robert Snape, 2018-04-05 In the final decades of the nineteenth century modernizing interpretations of leisure became of interest to social policy makers and cultural critics producing a discourse of leisure and voluntarism that flourished until the Second World War The free time of British citizens was increasingly seen as a sphere of social citizenship and community building Through major social thinkers including William Morris Thomas Hill Green Bernard Bosanquet and John Hobson leisure and voluntarism were theorized in terms of the good society In post First World War social reconstruction these writers remained influential as leisure became a field of social service directed towards a new society and working through voluntary association in civic societies settlements new estate community centres village halls and church based communities This volume documents the parallel cultural shift from charitable philanthropy to social service and from rational recreation to leisure teasing out intellectual influences which included social idealism liberalism and socialism Leisure Robert Snape claims has been a central and under recognized organizing force in British communities *Leisure Voluntary Action and Social Change in Britain 1880 1939* marks a much needed addition to the historiography of leisure and an antidote to the widely misunderstood implications of leisure to social policy today

Continuity and Change in Voluntary Action Rose Lindsey, John Mohan, 2018-05-30 There are great expectations of voluntary action in contemporary Britain but limited in depth insight into the level distribution and understanding of what constitutes voluntary activity Drawing on extensive survey data and written accounts of citizen engagement this book charts change and continuity in voluntary activity since 1981 How voluntary action has been defined and measured is considered alongside individuals accounts of their participation and engagement in volunteering over their lifecourses Addressing fundamental questions such as whether the public are cynical about or receptive to calls for greater voluntary action the book considers whether respective government expectations of volunteering can really be fulfilled Is Britain really a shared society or a big society and what is the scope for expansion of voluntary effort This pioneering study combines rich qualitative material from the Mass Observation Archive between 1981 and 2012 and data from many longitudinal and cross sectional social surveys Part of the Third Sector Research Series this book is informed by research undertaken at the Third Sector Research Centre funded by the Economic and Social Research Council and Barrow Cadbury Trust

Grassroots Associations David Horton Smith, 2000-05-11 This volume explores the world of grassroots organizations and outlines their history while differentiating them from the more familiar paid staff nonprofit organizations David Horton Smith a leading scholar on the nonprofit and

voluntary sector examines the available empirical research on the topic and analyzes the theoretical concepts that have come to define such associations. He affords the reader a complete detailed description of the nature and characteristics of grassroots organizations: their formation, structure, leadership, life cycle, effectiveness, and their integral role in postmodern societies. Making the Nonprofit Sector in the United States David C. Hammack, 1998-12-22. It is a delight to see an anthology on nonprofit history done so well. Barry Karl, John F. Kennedy School of Government, Harvard University. This is a volume that everyone concerned about nonprofits, scholar, practitioner, and citizen will find useful and illuminating. Peter Dobkin Hall, Program on Non-Profit Organizations, Yale Divinity School. A remarkable book. Robert Putnam, John F. Kennedy School of Government, Harvard University. One to come from John Simon, School of Law, Yale University. By Jan 13th and others are being solicited. Unique among nations, America conducts almost all of its formally organized religious activity and many cultural, arts, human service, educational, and research activities through private nonprofit organizations. Though partially funded by government as well as by fees and donations, American nonprofits have pursued their missions with considerable independence. Many have amassed remarkable resources and acquired some of the most impressive hospital, university, performing arts, and museum facilities in the world. While some have amassed large endowments, many that surpass one billion dollars, there are also hundreds of thousands of small nonprofits, most with no tangible resources at all. How did the United States come to rely so heavily on nonprofits? Why has it continued to do so? What purposes do Americans seek to advance through nonprofits? How have Americans sought to control them? How have nonprofits been effected by the growth of government in the twentieth century? These questions suggest the complexity of the history of nonprofits in the United States. To help explore that history, this reader presents some of the classic documents in the development of the nonprofit sector along with important interpretations by recent scholars. The selections can be considered a representative part of a single extended conversation by the men and women who have taken part in the effort to define America and the American dream, even as they shaped what we now call the nonprofit sector. The statements by participants in the growth and development of the nonprofit sector are accompanied by essays written by historians and social scientists that provide concise surveys of important issues and periods. The essays give voice to those whose contributions to the American debate about voluntary associations and private institutions would otherwise be difficult to find or comprehend. Dharma and Ecology of Hindu Communities Pankaj Jain, 2016-04-22 In Indic religious traditions a number of rituals and myths exist in which the environment is revered. Despite this nature worship in India its natural resources are under heavy pressure with its growing economy and exploding population. This has led several scholars to raise questions about the role religious communities can play in environmentalism. Does nature worship inspire Hindus to act in an environmentally conscious way? This book explores the above questions with three communities: the Swadhyaya movement, the Bishnoi, and the Bhil communities. Presenting the texts of Bishnois, their environmental history, and their contemporary activism, investigating the Swadhyaya movement from an ecological perspective, and exploring the Bhil communities and their Sacred Groves, this book applies a non-Western hermeneutical model to interpret the religious traditions of Indic communities. With a foreword by Roger S. Gottlieb

Foreign Aid for Indian NGOs Pushpa Sundar, 2020-11-29 This book explores what difference development aid has made to the size, complexity, style of functioning, values, and future direction of the NGO sector in India. It does this first by giving a comprehensive documentation of the experience of Indian NGOs with foreign aid since Independence. Simultaneously, it also analyses in a broad historical perspective some of the issues which are the subject of contemporary debate regarding the voluntary sector and aid, such as who decides what is development and how it should be brought about, whether foreign donors have hidden agendas, and if their aid amounts to cultural imperialism, and whether aid has made NGOs more self-reliant. The book also looks at the tripartite relationship between NGOs, donors, and governments, examining for instance whether the government is justified in imposing restrictions on receipt of funds by NGOs on the grounds that terrorist activities and religiously motivated communal strife are often financed with funds from abroad, with NGOs being used as fronts for both.
