Speaking Respect Respecting Speech:

Speaking Respect, Respecting Speech Richard L. Abel, 1998-05-06 The feminist campaign against pornography the furor over a racial epithet in the O J Simpson trial and Iran's continuing threat to kill Salman Rushdie exemplify the intense passions aroused by hurtful speech Richard Abel offers an original framework for understanding and attempting to resolve these pervasive and intractable conflicts Drawing on sociological theories of symbolic politics he views such confrontations as struggles for respect among status categories defined by nationality religion race gender sexual orientation and physical difference Abel convincingly exposes the inadequacies of the conventional responses to speech absolutist civil libertarianism and enthusiastic state regulation Instead he argues only apologies exchanged within the communities that construct collective identities can readjust social standing damaged by hurtful words and images In recasting the problem in terms of equalizing cultural capital Abel opens a new pathway through the wrongs and rights of speech **Campus Hate Speech on**

How to Accept German Reparations Susan

Slyomovics, 2014-06-10 In a landmark process that transformed global reparations after the Holocaust Germany created the

largest sustained redress program in history amounting to more than 60 billion When human rights violations are presented primarily in material terms acknowledging an indemnity claim becomes one way for a victim to be recognized At the same time indemnifications provoke a number of difficult questions about how suffering and loss can be measured How much is an individual life worth How much or what kind of violence merits compensation What is financial pain and what does it mean to monetize concentration camp survivor syndrome Susan Slyomovics explores this and other compensation programs both those past and those that might exist in the future through the lens of anthropological and human rights discourse How to account for variation in German reparations and French restitution directed solely at Algerian Jewry for Vichy era losses Do crimes of colonialism merit reparations How might reparations models apply to the modern day conflict in Israel and Palestine The author points to the examples of her grandmother and mother Czechoslovakian Jews who survived the Auschwitz Plaszow and Markkleeberg camps together but disagreed about applying for the post World War II Wiedergutmachung to make good again reparation programs Slyomovics maintains that we can use the legacies of German reparations to reconsider approaches to reparations in the future and the result is an investigation of practical implications complicated by the difficult legal ethnographic and personal questions that reparations inevitably prompt

Harmful Thoughts Meir Dan-Cohen, 2009-01-10 In these writings by one of our most creative legal philosophers Meir Dan Cohen explores the nature of the self and its response to legal commands and mounts a challenge to some prevailing tenets of legal theory and the neighboring moral political and economic thought The result is an insider's critique of liberalism that extends contemporary liberalism's Kantian strand combining it with postmodernist ideas about the contingent and socially constructed self to build a thoroughly original perspective on some of the most vital concerns of legal and moral theory Dan Cohen looks first at the ubiquity of legal coercion and considers its decisive impact on the nature of legal discourse and communication on law's normative aspirations and claim to obedience and on the ideal of the rule of law He moves on to discuss basic values stressing the preeminence of individual identity and human dignity over the more traditional liberal preoccupations with preference based choice and experiential harm Dan Cohen then focuses more directly on the normative ramifications of the socially constructed self Fundamental concepts such as responsibility and ownership are reinterpreted to take account of the constitutive role that social practices particularly law and morality play in the formation of the self Throughout Dan Cohen draws on a uniquely productive mix of philosophical traditions and subjects blending the methods of analytic philosophy with the concerns of Continental philosophers to reconceive the self and its relation to ethics and the law **The Juvenile Sex**
