**The Spiralling of the Securitisation of Migration in the European Union** Valeria Bello, Sarah Léonard, 2023-03-31 This book investigates how migration has been transformed into a security threat in Europe It argues that this process has taken place through a self fulfilling spiralling process which involves different actors and their specific narratives practices and policies The book examines how situations stemming from the so called migration crisis in the European Union EU have been dealt with by governments and non governmental organisations It also considers how actors treating migration as an ordinary phenomenon rather than a threat and sharing inclusive narratives can create the conditions for decelerating and eventually stopping securitisation processes Some chapters examine the spiralling of the securitisation of migration in depth by analysing increases in securitisation as well as cases characterised by resistance Others focus on examining the consequences of socially constructing migration as a crisis for the EU s relations with third countries In sum this book shows that there is a wide range of motives for which states and societies would benefit from a change in migration politics and move from the current management of a crisis to a more

positive governance of human mobility It will be of interest to researchers and advanced students of sociology politics international relations social and cultural anthropology human geography and social work This book was originally published as a special issue of the Journal of Ethnic and Migration Studies *Mortgaged Backed Securities* Harold Keller,2006-10-27 Inhaltsangabe Summary In order to ensure that the mortgage market remains buoyant lenders require constant access to sufficient funds Traditionally mortgage lenders rely on retail deposits mortgage covered bonds or dedicated savings to provide this source of funding However those providers who do not have the luxury of an established and reliable retail deposit base or high credit rating necessary for cheap money market credit are forced to think of alternatives Securitization of originated mortgage loans can provide the answer Financial institutions that originate loans are able to turn their loans into marketable securities through a process known as securitization The originators of the loans are commonly referred to as the issuers of asset backed securities ABS ABS constitute a relatively new but fast growing segment of the debt markets in Europe The combination of a number of legal and economic factors has provided a favorable climate for securitization in Europe especially in the United Kingdom UK and in its country of origin the United States US In turn these countries have experienced considerable growth in securitization volumes over the past years In contrast due to a weak economy and an unfavorable legal tax and regulatory environment the German securitization market was not able to develop in much the same way However the German economy has started to recover in the current year and is forecasted to continue growing in 2007 This economic growth will in turn drive the domestic mortgage demand In addition based on the state and structure of the German mortgage market it is becoming increasingly attractive for foreign investors Thus both the economic recovery and an increased mortgage demand will drive the funding requirements of German banks Moreover the significance of securitization as an alternative refinancing instrument for residential mortgages is likely to grow not least because the elimination of the legal tax and regulatory hurdles has enhanced the attractiveness of true sale securitization in Germany The title of the thesis is called *Mortgage Backed Securities A New Source of Financing Retail Mortgages for German Banks* As raising finance is elementary to the growth and profitability of banks the hypothesis of the thesis inevitably boils down to the question whether the application of mortgage backed securities MBS increases the ability of German banks to raise finance for

*EU Labor Markets After Post-Enlargement Migration* Martin Kahanec, Klaus F. Zimmermann, 2009-10-10 Selected by Princeton University as Noteworthy Book in Industrial Relations and Labor Economics for 2010 Are immigrants from the new EU member states a threat to the Western welfare state Do they take jobs away from the natives And will the source countries suffer from severe brain drain or demographic instability In a timely and unprecedented contribution this book integrates what is known about post enlargement migration and its effects on EU labor markets Based on rigorous analysis and hard data it makes a convincing case that there is no evidence that the post enlargement labor migrants would on aggregate displace native workers or lower their wages or that they would be more dependent on welfare While brain drain may be a concern in the source countries the anticipated brain circulation between EU member states may in fact help to solve their demographic and economic problems and improve the

allocative efficiency in the EU The lesson is clear free migration is a solution rather than a foe for labor market woes and cash strapped social security systems in the EU Nonstate Actors in Intrastate Conflicts Dan Miodownik, Oren Barak, 2014 Through case studies of Afghanistan Lebanon Israel Palestine and Turkey this volume examines the manifold roles of external nonstate actors in influencing the outcome of hostilities within a state's borders
