Species Of Origins Americas Search For A Creation Story:

Species of Origins Karl Giberson,Donald A. Yerxa,2002 In *Species of Origins* Karl W Giberson and Donald A Yerxa examine America s controversial conversation about creation and evolution While noting that part of the discord stems from the growing cultural and religious diversity of the United States they argue powerfully that the real issue is the headlong confrontation between two seemingly incompatible worldviews upon which millions of Americans rely modern naturalistic science and traditional Judeo Christian religions Visit our website for sample chapters **Species of Origins** Karl W. Giberson,Donald A. Yerxa,2002-10-09 In *Species of Origins* Karl W Giberson and Donald A Yerxa examine America s controversial conversation about creation and evolution While noting that part of the discord stems from the growing cultural and religious diversity of the United States they argue powerfully that the real issue is the headlong confrontation between two seemingly incompatible worldviews upon which millions of Americans rely modern naturalistic science and traditional Judeo Christian religions **Culture's Vanities** David Steigerwald,2004 Americans want it both ways They are committed to cultural diversity yet demand an endless variety of cheap consumer goods from a global system that destroys distinct ways of life In this groundbreaking work David Steigerwald argues that Americans have papered over this paradox by embracing the rhetoric of diversity and multiculturalism which hides the extent to which they have accepted homogenized ways of working and living Brahmin Prophet Gillis J. Harp,2003 The Reverend Phillips Brooks was undeniably one of the most popular preachers of Gilded Age America and the author of the beloved Christmas carol O Little Town of Bethlehem However very few critical studies of his life and work exist In this insightful book Gillis J Harp places Brooks s religious thought in its proper historical cultural and ecclesiastical contexts while clarifying the sources of Brooks s inspiration The result is a fuller richer portrait of this luminous figure and of this transitional era in American protestantism *Oracles of Science* Karl Giberson,Mariano Artigas,2009-02-27 *Oracles of Science* examines the popular writings of the six scientists who have been the most influential in shaping our perception of science how it works and how it relates to other fields of human endeavor especially religion Biologists Stephen Jay Gould Richard Dawkins and Edward O Wilson and physicists Carl Sagan Stephen Hawking and Steven Weinberg have become public intellectuals articulating a much larger vision for science and what role it should play in the modern worldview The scientific prestige and literary eloquence of each of these great thinkers combine to transform them into what can only be called oracles of science Their controversial often personal sometimes idiosyncratic opinions become widely known and perceived by many to be authoritative Curiously the leading oracles of science are predominantly secular in ways that don t reflect the distribution of religious beliefs within the scientific community Many of them are even hostile to religion creating a false impression that science as a whole is incompatible with religion Karl Giberson and Mariano Artigas offer an informed analysis of the views of these six scientists carefully distinguishing science from philosophy and religion in the writings of the oracles This book will be welcomed by many who are disturbed by the tone

of the public discourse on the relationship between science and religion and will challenge others to reexamine their own preconceptions about this crucial topic *Process and Providence* Bradley J. Gundlach, 2013-11-30 Charles Hodge James McCosh B B Warfield these leading professors at Princeton College and Seminary in the nineteenth and early twentieth centuries are famous for their orthodox Protestant positions on the doctrine of evolution In this book Bradley Gundlach explores the surprisingly positive embrace of developmental views by the whole community of thinkers at old Princeton showing how they embraced the development not only of the cosmos and life forms but also of Scripture and the history of doctrine even as they defended their historic Christian creed Decrying an intellectual world gone evolution mad the old Princetonians nevertheless welcomed evolution properly limited and explained Rejecting historicism and Darwinism they affirmed developmentalism and certain non Darwinian evolutionary theories finding process over time through the agency of second causes God s providential rule in the world both enlightening and polemically useful They also took care to identify the pernicious causes and effects of antisupernatural evolutionisms By the 1920s their nuanced distinctions together with their advocacy of both biblical inerrancy and modern science were overwhelmed by the brewing fundamentalist controversy From the first American review of the pre Darwinian *Vestiges of the Natural History of Creation* to the Scopes Trial and the forced reorganization of Princeton Seminary in 1929 *Process and Providence* reliably portrays the preeminent conservative Protestants in America as they defined contested and answered precisely and incisively the many facets of the evolution question **The Energy Prescription** Constance Grauds, R.Ph., Doug Childers, 2005-07-26 Are You Suffering from a Personal Energy Crisis In this groundbreaking book renowned educator natural medicine pharmacist and initiated shamana Connie Grauds helps you tap into the wellsprings of vital positive energy that lie within you but are often blocked by the dispiriting negative energy of fear Combining cutting edge Western science with the ancient healing principles of shamanism Grauds explains how fear and its side effects are at the root of a variety of ailments from lethargy depression and insomnia to the most serious illnesses and provides a practical program that will revitalize every area of your life From restoring physical and emotional health to gaining harmony in work and personal relationships here are exercises that will teach you how to Eliminate energy depleting habits and create new energy generating behaviors identify your energy leaks release stress and tension through a deeper somatic awareness and to restore the dynamic flow of energy through the eight primary entradas or gateways mind soul breath water food exercise nature relationships and altruism In addition Grauds shares personal experiences from her fascinating ten year apprenticeship in the Amazon with a master healer Now you can begin on a path of balance wisdom sanity and self knowledge that will support even the most demanding lifestyle and help you achieve the optimum health that is naturally yours **Science and Faith within Reason** Jaume Navarro, 2016-04-01 Scientists historians philosophers and theologians often engage in debates on the limitations and mutual interactions of their respective fields of study Serious discussions are often overshadowed by the mass produced popular and semi popular literature on

science and religion as well as by the political agendas of many of the actors in these debates For some reducing religion and science to forms of social discourse is a possible way out from epistemological overlapping between them yet is there room for religious faith only when science dissolves into one form of social discourse The religion thus rescued would have neither rational legitimisation nor metaphysical validity but if both scientific and religious theories try to make absolute claims on all possible aspects of reality then conflict between them seems almost inevitable In this book leading authors in the field of science and religion including William Carroll Steve Fuller Karl Giberson and Roger Trigg highlight the oft neglected and profound philosophical foundations that underlie some of the most frequent questions at the boundary between science and religion the reality of knowledge and the notions of creation life and design In tune with Mariano Artigas s work the authors emphasise that these are neither religious nor scientific but serious philosophical questions

The Language of Science and Faith Karl W. Giberson, Francis S. Collins, 2011-01-28 World renowned scientist Francis Collins and fellow scientist Karl Giberson show how we can embrace both science and faith without compromising either Their fascinating treatment explains how God cares for and interacts with his creation while science offers a reliable way to understand the world he made

Echoes of Coinherence W. Ross Hastings, 2017-07-28 This book re imagines the universe and the scientific study of it through the lens of a triune Creator three persons of irreducible identity in a perichoretic or coinherent communion It modestly proposes that Trinitarian theology and especially the coinherent natures of the Son in the incarnation provides the metaphysic or theory of everything that manifests itself in the subject matter of science The presence of the image of the triune God in humanity and of traces of this God in the non human creation are discussed highlighting ontological resonances between God and creation resonances between the being of God and his creation such as goodness immensity yet particularity intelligibility agency relationality and beauty This Trinitarian reality suggests there should be a similarity also with respect to how we know in theology and science critical realism something reflected in the history of ideas in each These resonances lead to the conclusion that the disciplines of theology and science are in fact coinherent not conflicted This involves recognition of both the mutuality of these vocations and also importantly their particularity Science its own distinct guild yet finds its place ensconced within an encyclopedic theology and subject to first order credal theology

Recent Themes in World History and the History of the West Donald A. Yerxa, 2009 New insights on global histories and Western civilization from leading scholars in the field Described as the New York Review of Books for history Historically Speaking has emerged as one of the most distinctive historical publications in recent years actively seeking out contributions from a pantheon of leading voices in historical discourse from both inside and outside academia Recent Themes in World History and the History of the West represents some of the best writing on Western civilization and world history in the past five years This collection of essays and interviews from Historically Speaking gives leading historians approaches to the continually evolving field of world history with a specific emphasis on the relationship of Western civilization to the history of

the world The book also discusses the effect of empire on global history and the many ways empire continues to manifest in the contemporary world The contributors discuss world history as an intricate story of the connections within the global community rather than a tidy static narrative that attempts to summarize everything in our global past In this volume the study of world history is presented as a constantly comparative endeavor concerned with the major themes that link and divide humanity

Existential Threats Lisa Vox,2017-07-03 In *Existential Threats* Lisa Vox explores the growth of dispensationalist premillennialism alongside scientific understandings of the end of the world and contends that these two allegedly competing visions have converged to create an American apocalyptic imagination

The Oxford Handbook of Religion and Science Philip Clayton,Zachary Simpson,2006 The field of science and religion is exploding in popularity among both academics and the reading public This is a comprehensive and authoritative introduction to the debate written by the leading experts yet accessible to the general reader

Explorations in Neuroscience, Psychology and Religion Kevin S. Seybold,2016-04-15 In the 1990s great strides were taken in clarifying how the brain is involved in behaviors that in the past had seldom been studied by neuroscientists or psychologists This book explores the progress begun during that momentous decade in understanding why we behave think and feel the way we do especially in those areas that interface with religion What is happening in the brain when we have a religious experience Is the soul a product of the mind which is in turn a product of the brain If so what are the implications for the Christian belief in an afterlife If God created humans for the purpose of having a relationship with him should we expect to find that our spirituality is a biologically evolved human trait What effect might a disease such as Alzheimer s have on a person s spirituality and relationship with God Neuroscience and psychology are providing information relevant to each of these questions and many Christians are worried that their religious beliefs are being threatened by this research Kevin Seybold attempts to put their concerns to rest by presenting some of the scientific findings coming from these disciplines in a way that is understandable yet non threatening to Christian belief
