Trübner's Catalogue of Dictionaries and Grammars of the Principal Languages and Dialects of the World. 2d Ed., Considerably Enlarged and Revised, with an Alphabetical Index. A Guide for Students and Booksellers ,1882 Trübner's Catalogue of Dictionaries and Grammars of the Principal Languages and Dialects of the World Nicolas Trübner,1882 **A catalogue of dictionaries and grammars of the principal languages and dialects of the world, for sale by Trübner & co. [With] Trübner's oriental & linguistic publications, a catalogue** Trübner and co,1882 *A Catalogue of Dictionaries and Grammars of the principal languages and dialects of the world; with a list of the leading works in the science of language* Nikolaus Trübner,1882 A Grammar of the Kolokuma Dialect of Ijọ Kay Williamson,2011-08-11 This 1969 monograph is a descriptive grammar of a dialect of j or Ijaw a language spoken in the Niger Delta area of Southern Nigeria The dialect described Kolokuma is quite widely understood The most interesting features of the language on which the monograph concentrates are its syntax and tonal system *The Human Tradition in Modern Africa* Dennis D. Cordell,2012 This rich collection of biographies of African men and women adds a crucial human dimension to our understanding of African history since 1800 The last two centuries have been a time of enormous change on the continent and these life stories show how people survived by resisting European conquest and colonial rule by collaborating with colonial powers or by finding a middle way to live their lives through tumultuous times Bringing the story to the present the book traces the era of independence since the 1960s through challenges to the rule of African dictators struggles for the rights of women and mothers the exploitation of youth and child soldiers and economic booms and busts By recounting the lives of real identifiable people from societies across Africa south of the Sahara and from African communities in Europe this unique book underscores the importance and power of individual agency in understanding the recent African past a vital complement to analyses of broader impersonal social and economic factors Contributions by Agn s Adjamagbo Maryan Muuse Boqor Dennis D Cordell Jos C Curto Mamadou Diouf Andreas Eckert Laura Fair Tovin Falola Doug Henry Lidwien Kapteijns Issiaka Mand Cora Ann Presley Carolyn F Sargent Pamela Scully Ibrahim Sundiata and Marcia Wright *The Languages of West Africa* Diedrich Westermann,M. A. Bryan,2017-09-22 This volume originally published in 1970 presents a survey of the languages spoken in an area extending from the Atlantic coast at the Sengal River eastward to the Lake Chad region The area covered by this volume is mainly a geographical one so it follows that not all the languages included are related to one another though a certain degree of homogeneity appears **A Grammar of the Asante and Fante Language Called Tshi Chwee, Twi Based on the Akuapem Dialect with Reference to the Other (Akan and Fante)**

Dialects Johann Gottlieb Christaller, 1875 **A Grammar of Igala** Ejeba, Salem Ochala, 2017-01-17 The book establishes 28 phonemic consonants and 7 vowels as well as lexical and grammatical tones in Igala. It shows the canonical syllable types as V and CV with no complexity and relates resyllabification to the retiming of segments as tone bearing units and the duration of their mora. The work discusses nine word classes as well as ideophones and clitics in Igala. There are splitting verbs of various structures and fully fledged pronouns with morphologically toneless clitic counterparts that are toned in their syntactic context among other elements of the Igala morphology. The work establishes clitics as generally bearing the grammatical tones of various categories as a result of their morphological tonelessness and their availability for post lexical tone assignment. It also accounts for the generally complex interaction of clitics and tones in the organisation of the morphosyntax and the tone syntax interface. Igala has both verbal and nominal extensional affixes with various semantic features. Some interesting discussions in the Igala syntax include the structural and functional types of serial verb constructions, the detransitivizing process of verb movement in object demoting structures, coreferentiality in relativised constituents and the future non future temporal distinction. Complementary binominals are conjoined with a specified binominal morpheme and their rigidly irreversible structures have implications in the Igala semantics. The binominals demonstrate a grammatically specified pattern defined over a conceptual space showing the network among conceptual categories such as kinship, marital, social, hunter, hunted, more, less, and cause effect relationships as reflected in the Igala grammar.

Dimmendaal, 2011-06-08 This advanced historical linguistics course book deals with the historical and comparative study of African languages. The first part functions as an elementary introduction to the comparative method involving the establishment of lexical and grammatical cognates, the reconstruction of their historical development, techniques for the subclassification of related languages and the use of language internal evidence, more specifically the application of internal reconstruction. Part II addresses language contact phenomena and the status of language in a wider cultural, historical and ecological context. Part III deals with the relationship between comparative linguistics and other disciplines. In this rich course book the author presents valuable views on a number of issues in the

comparative study of African languages more specifically concerning genetic diversity on the African continent the status of pidginised and creolised languages language mixing and grammaticalisation
