Child as Method Erica Burman, 2024-03-19 In this vital volume Erica Burman presents a synthesis of her work developed over the past decade Building from her path breaking critiques of developmental psychology to the strategy of plural developments her more recent work elaborates a new approach generated from postcolonial feminist intersectionality and migration studies *Child as method* This text amplifies the *Child as method* s success as a distinct way of exploring the alignments of current new materialist or posthumanist approaches with supposedly older materialist analyses including Marxist theory feminist theory anticolonial approaches and psychoanalytic perspectives It assumes that childhood is a material practice both undertaken by children themselves and by those who live and work with them as well as by those who define politics policies and popular culture about children Key chapters interrogate historical legacies arising from the Eurocentric origins of what are now globalised models of modern childhood and evaluate the problems posed by the structure of emotion and affectivity that surrounds children and childhood by tracing its evolution and indicating some of its unhelpful current effects in recentring white Majority world subjectivities *Child as Method* provides key contributions to a range of disciplines and debates including developmental psychology critical childhood studies education studies legal studies health and social care and literature

The Best Medicine: How Science

and Public Health Gave Children a Future Perri Klass, 2020-10-13 The fight against child mortality that transformed parenting, doctoring, and the way we live. Only one hundred years ago, even the world's wealthiest nations' children died in great numbers of diarrhea, diphtheria, and measles, scarlet fever, and tuberculosis. Throughout history, culture has been shaped by these deaths; diaries and letters recorded them, and writers such as Louisa May Alcott, W. E. B. Du Bois, and Eugene O'Neill wrote about and mourned them. Not even the powerful and the wealthy could escape. Of Abraham and Mary Lincoln's four children, only one survived to adulthood, and the first billionaire in history, John D. Rockefeller, lost his beloved grandson to scarlet fever. For children of the poor, immigrants, enslaved people, and their descendants, the chances of dying were far worse. The steady beating back of infant and child mortality is one of our greatest human achievements. Interweaving her own experiences as a medical student and doctor, Perri Klass pays tribute to groundbreaking women doctors like Rebecca Lee Crumpler, Mary Putnam Jacobi, and Josephine Baker, and to the nurses, public health advocates, and scientists who brought new approaches and scientific ideas about sanitation and vaccination to families. These scientists, healers, reformers, and parents rewrote the human experience so that, for the first time in human memory, early death is now the exception rather than the rule, bringing about a fundamental transformation in society, culture, and family life. Previously published in hardcover as *A Good Time to Be Born*. **Fit Baby, Smart Baby, Your Baby!** Glenn Doman, Douglas Doman, Bruce Hagy, 2021-07-27 The early development of mobility in newborns is a vital part of their future ability to learn and grow to full potential. We may be wasting our children's most important years by preventing them from physically exploring their world and maximizing their mobility development when they are young, the time that is easiest for them to do so. In *Fit Baby, Smart Baby, Your Baby*, Glenn Doman, founder of The Institutes for the Achievement of Human Potential, along with Douglas Doman and Bruce Hagy, guide you in maximizing your child's physical capabilities. They clearly explain each stage of mobility and show how to create an environment that will help your baby more easily achieve that stage. Full-color charts, photographs, illustrations, and detailed yet easy-to-follow instructions are included to help you create an effective home program. This inspiring book shows how the team of mother, father, and baby can explore and discover together the joys of human mobility. From learning the simple but vital stage of crawling to the beginnings of the sophisticated skills of the gymnast, this athletic team is the one that's most important to baby. *Mind and Body*, 1913 **Beyond Borders** Paloma Fresno-Calleja, Janet M. Wilson, 2022-09-29 This book examines the global-local intersections and tensions at play in the literary production from Aotearoa New Zealand through its engagement in the global marketplace. Combining postcolonial and world literature methodologies, contributors chart the global relocation of national culture from the nineteenth century to the present, exploring what New Zealand literature means in different creative teaching and publishing contexts. They identify ongoing global entanglements with local identities and tensions between national and post-national literary discourses, considering Aotearoa New Zealand's history as a white settler colony and its status as a bicultural nation and a key player in the Asia
