Material London, ca. 1600 Lena Cowen Orlin, 2012-10-19 Between 1500 and 1700 London grew from a minor national capital to the largest city in Europe The defining period of growth was the period from 1550 to 1650 the midpoint of which coincided with the end of Elizabeth I's reign and the height of Shakespeare's theatrical career In *Material London ca. 1600* Lena Cowen Orlin and a distinguished group of social intellectual urban architectural and agrarian historians archaeologists cultural anthropologists and literary critics explore the ideas structures and practices that distinguished London before the Great Fire basing their investigations on the material traces in artifacts playtexts documents graphic arts and archaeological remains In order to evoke material London ca. 1600 each scholar examines a different aspect of one of the great world cities at a critical moment in Western history Several chapters give broad panoramic and authoritative views what architectural forms characterized the built city around 1600 how the public theatre established its claim on the city how London's citizens incorporated the new commercialism of their culture into their moral views Other essays offer sharply focused studies how Irish mantles were adopted as elite fashions in the hybrid culture of the court how the city authorities clashed with the church hierarchy over the building of a small bookshop how London figured in Ben Jonson's exploration of the role of the poet Although all the authors situate the material world of early modern London its objects products literatures built environment and economic practices in its broader political and cultural contexts provocative debates and exchanges remain both within and between the essays as to what constitutes material London ca. 1600

Plotting Early Modern London Dieter Mehl, 2017-03-02 With the publication of Brian Gibbons's *Jacobean City Comedy* thirty five years ago the urban satires by Ben Jonson John Marston and Thomas Middleton attained their official status as a Renaissance subgenre that was distinct by its farcical humour and ironic tone from citizen comedy or London drama more generally This retrospective genre building has proved immensely fruitful in the study of early modern English drama and although city comedies may not yet rival Shakespeare's plays in the amount of editorial work and critical acclaim they receive both the theatrical contexts and the dramatic complexity of the genre itself and its interrelations with Shakespearean drama justly command an increasing level of

attention Looking at a broad range of plays written between the 1590s and the 1630s master pieces of the genre like Eastward Ho A Trick to Catch the Old One The Dutch Courtesan and The Devil is an Ass blends of romance and satire like The Shoemaker s Holiday and The Knight of the Burning Pestle and bourgeois oddities in the Shakespearean manner like The London Prodigal the twelve essays in this volume re examine city comedy in the light of recently foregrounded historical contexts such as early modern capitalism urban culture the Protestant Reformation and playhouse politics Further they explore the interrelations between city comedy and Shakespearean comedy both from the perspective of author rivalry and in terms of modern adaptations the twenty first century concept of popular Shakespeare above all in the movie sector seems to realign the comparatively time and placeless Shakespearean drama with the gritty noisy and bustling urban scene that has been city comedy s traditional preserve

Time Matter(s): Invention and Re-Imagination in Built Conservation

Federica Goffi,2016-02-24 Even though the idea of altering an existing building is presently a well established practice within the context of adaptive reuse when the building in question is a mnemonic building of recognized heritage value alterations are viewed with suspicion even when change is a recognized necessity This book fills in a blind spot in current architectural theory and practice looking into a notion of conservation as a form of invention and imagination offering the reader a counter viewpoint to a predominant western understanding that preservation should be a still shot from the past Through a micro historical study of a Renaissance concept of restoration a theoretical framework to question the issue of conservation as a creative endeavor arises It focuses on Tiberio Alfarano s 1571 ichnography of St Peter s Basilica in the Vatican into which a complex body of religious political architectural and cultural elements is woven By merging past and present temple s plans he created a track drawing questioning the design pursued after Michelangelo s death 1564 opening the gaze towards other possible future imaginings This book uncovers how the drawing was acted on by Carlo Maderno 1556 1629 who literally used it as physical substratum to for new design proposals completing the renewal of the temple in 1626 Proposing a hybrid architectural conservation approach this study shows how these two practices can be merged in contemporary renovation By creating hybrid drawings the retrospective and prospective gaze of built conservation forms a continuous and contiguous reality where a pre existent condition engages with future design rejoining multiple temporalities within continuity of identity This study might provide a paradigmatic and timely model to retune contemporary architectural sensibility when dealing with the dilemma between design and preservation when transforming a building of recognized significance
