In-situ Spectroscopy in Heterogeneous Catalysis James F. Haw, 2002 Not using in situ methods to examine catalytic processes is like studying a life with access only to the prenatal and postmortem states This quote from the world renowned specialist in the field of in situ methods Gabor A Somorjai clearly emphasizes the importance of these techniques in understanding heterogeneous catalysis a type of chemical reaction used nowadays for most chemically produced supplies and fuels Yet the fundamental mechanisms are often still not completely understood Many of the leading scientists in the field have contributed to this book which provides an overview of the most varied spectroscopic and related methods for studying catalytic structures and their functions during a chemical reaction While primarily written for users of these methods this is also a valuable aid to interpreting the phenomena observed Indispensable for everyone working in the field
