Strategies to Protect the Health of Deployed U.S. Forces Institute of Medicine, Medical Follow-Up Agency, 1999-01-01 Nine years after Operations Desert Shield and Desert Storm the Gulf War ended in June 1991 uncertainty and questions remain about illnesses reported in a substantial percentage of the 697 000 service members who were deployed Even though it was a short conflict with very few battle casualties or immediately recognized disease or non battle injuries the events of the Gulf War and the experiences of the ensuing years have made clear many potentially instructive aspects of the deployment and its hazards Since the Gulf War several other large deployments have also occurred including deployments to Haiti and Somalia Major deployments to Bosnia Southwest Asia and most recently Kosovo are ongoing as this report is written This report draws on lessons learned from some of these deployments to consider strategies to protect the health of troops in future deployments In the spring of 1996 Deputy Secretary of Defense John White met with leadership of the National Research Council and the Institute of Medicine to explore the prospect of an independent proactive effort to learn from lessons of the Gulf War and to develop a strategy to better protect the health of troops in future deployments

Suicide Among the Armed Forces Antoon Leenaars, 2016-12-05 Not since the great military suicide epidemic of the American Civil War have we seen so many of our heroes our soldiers and veterans die by suicide Why War is violence There is intent to cause death or serious injury or threat to the physical and psychological integrity of others War stress is unforgiving Suicide is an all too frequent response Today one member of the military dies by suicide every day This is a new epidemic This book addresses some tough questions What do we know about suicides in the military Are rates high Or low Is military suicide the same or different in the United States and Canada Is military culture relevant Do we know the causes patterns and associations Is suicide among the armed forces similar to or different from suicide among civilians Can it be altruistic Through individual case studies and general population approaches we attempt to understand the cost of military service It is especially through the personal stories of the great Civil War hero General Emory Upton Admiral of the Navy Mike Boorda and Hospital Corpsman Chris Purcell that we find answers We learn there is a relative lack of understanding about military suicides mainly due to the very complexity of suicide The nature of suicide is not monolithic it is multi determined Military service we find is a risk factor for suicide and suicidal behavior Military veterans are twice as likely as civilians to die by suicide Posttraumatic stress disorder PTSD and traumatic brain Injury TBI are especially noted to be huge risk factors but so are other physical and psychological injuries Sadly the aftershocks of war include not only suicides but also incarceration motor vehicle accidents homicides homicide s suicides and many more faces of violence And there are many more uncounted wounded and dead The families of traumatized soldiers and veterans too are indirect victims of their traumatic experience and for some their suicides there is secondary traumatization Yet as this book shows we must not forget that despite the unbearable pain of war soldiers veterans and their military families including children are typically

resilient They can survive Without question our vulnerable heroes and veterans are at risk for suicide But there is secrecy surrounding this which may well be the biggest barrier The government the Department of Defense the military veterans groups survivors health providers and other stakeholders need to develop and support more research more programs and more care for suicidal and disabled armed services personnel veterans and survivors This war stress needs to stop

Textbooks of Military Medicine: Recruit Medicine , Covers important aspects of recruit medicine such as the medical qualifications process health promotion and environmental risk management chronic diseases such as asthma injury prevention and management communicable illnesses behavior dental and women s health and recruit mortality Combat and operational behavioral health ,2011 War Psychiatry Franklin D. Jones,1995 This volume of the Textbook of Military Medicine addresses the delivery of mental health services during wartime The foreseeable future of the U S military includes the potential for involvement in a variety of conflicts ranging from peace keeping missions to massive deployments of personnel and materiel and possible nuclear biological and chemical threats as was seen in the Persian Gulf War The medical role in wartime is critical to success of the mission For the mental health disciplines this role encompasses identification and elimination of unfit personnel improvement of marginal personnel to standards of acceptability prevention of psychiatric casualties and their treatment when prevention fails All of these efforts must be guided by past experience and sound principles of human behavior Military Medical Ethics, Volume 2 , **Military Medical Ethics for the 21st Century** Michael L. Gross,Don Carrick,2016-04-22 As asymmetric wars among the people replace state on state wars in modern armed conflict the growing role of military medicine and medical technology in contemporary war fighting has brought an urgent need to critically reassess the theory and practice of military medical ethics Military Medical Ethics for the 21st Century is the first full length broad based treatment of this important subject Written by an international team of practitioners and academics this book provides interdisciplinary insights into the major issues facing military medical decision makers and critically examines the tensions and dilemmas inherent in the military and medical professions In this book the authors explore the practice of battlefield bioethics medical neutrality and treatment of the wounded enhancement technologies for war fighters the potential risks of dual use biotechnologies patient rights for active duty personnel military medical research and military medical ethics education in the 21st Century Military Review ,1980 Psychiatric Casualties Mark Russell,Charles Figley,2021-06-15 The psychological toll of war is vast and the social costs of war s psychiatric casualties extend even further Yet military mental health care suffers from extensive waiting lists organizational scandals spikes in veteran suicide narcotic overprescription shortages of mental health professionals and inadequate treatment The prevalence of conditions such as post traumatic stress disorder is often underestimated and there remains entrenched stigma and fear of being diagnosed Even more alarming is how the military dismisses or conceals the significance and extent of the mental health crisis The trauma experts Mark C Russell and Charles Figley offer an impassioned and

meticulous critique of the systemic failures in military mental health care in the United States They examine the persistent disconnect between war culture which valorizes an appearance of strength and seeks to purge weakness and the science and treatment of trauma Instead of reckoning with the mental health crisis the military has neglected the needs of service members It has discharged prosecuted and incarcerated a large number of people struggling with the psychological realities of war and it has inflicted humiliation ridicule and shame on many more Through a far reaching historical account Russell and Figley detail how the military has perpetuated a self inflicted crisis The book concludes with actionable prescriptions for change and a comprehensive approach to significantly improving military mental health **US Army Psychiatry in the**

Significantly reduced list price This book tells the mostly forgotten story of the accelerating mental health problems that arose among the troops sent to fight in South Vietnam especially the morale discipline and heroin crisis that ultimately characterized the second half of the war This situation was unprecedented in U S military history and dangerous and reflected the fact that during the war America underwent its most divisive period since the Civil War and as a result the war became bitterly controversial The author is a career Army psychiatrist who led a psychiatric unit in Vietnam In the years following his return he was dismayed to discover that the Army had conducted no formal review of this alarming situation including from the standpoint of military psychiatry and had lost or destroyed all of the pertinent clinical records In addition to permitting a study of the psychological wounds and their treatment in Vietnam these records would have been priceless in the treatment of the legions of veterans who presented serious adjustment problems and Post traumatic Stress Disorder As a consequence Dr Camp has been relentless in combing the professional civilian and surviving military literature including unpublished documents to construct a compelling narrative documenting the successes and failures of Army psychiatry and the Army leadership in Vietnam in responding to these psychiatric and behavioral challenges The result is a book that is both scholarly and intensely personal includes vivid case material and anecdotes from colleagues who also served there and is replete with illustrations and correspondence It presents the story of Vietnam in a fresh manner through the psychiatrist's eyes and sensibilities US Army Psychiatry in the Vietnam War: New Challenges in Extended Counterinsurgency Warfare

psychiatry in responding to the psychiatric and behavioral problems that changed and expanded as the war became protracted and bitterly controversial Mental health professionals especially psychiatrists in both military and civilian professions as well as military historians researching the Vietnam era may be interested in this volume Related products A Shared Burden The Military and Civilian Consequences of Army Pain Management Since 2001 can be found here <https://bookstore.gpo.gov/products/sku/008/000/01151/6> Mild Traumatic Brain Injury Rehabilitation Toolkit can be found here <https://bookstore.gpo.gov/products/sku/008/020/01632/2> Textbooks of Military Medicine Pt 1 Warfare Weaponry and the Casualty Military Psychiatry Preparing in Peace for War can be found here <https://bookstore.gpo.gov/products/sku/008/023/00112/0>
