Textile Wet Processes: Preparation of fibers and fabrics Edward S. Olson, 1983-01-01 **Fibres to Smart Textiles** Asis Patnaik, Sweta Patnaik, 2019-08-08 *Fibres to Smart Textiles* Advances in Manufacturing Technologies and Applications offers comprehensive coverage of the fundamentals and advances in the textile and clothing manufacturing sectors. It describes the basics of fibres, yarns and fabrics and their end use in the latest developments and applications in the field and addresses environmental impacts from textile processes and how to minimize them. This book serves as a single comprehensive source discussing textile fibres, yarn formation, filament formation, techniques, woven fabric formation, knitting technologies, nonwoven manufacturing technologies, braiding technologies and dyeing, printing and finishing processes. Testing of textile materials, environmental impacts of textile processes and use of CAD and CAM in designing textile products are also included. The book also discusses applications including textile composites and biocomposites, technical textiles, smart textiles and nanotextiles. With chapters authored by textile experts, this practical book offers guidance to professionals in textile and clothing manufacturing and shows how to avoid potential pitfalls in product development. **The Impact and Prospects of Green Chemistry for Textile Technology** Shahid Ul Islam, Bhupendra Singh Butola, 2018-11-02 *The Impact and Prospects of Green Chemistry for Textile Technology* provides a review and summary of the role of green chemistry in textiles, including the use of green agents and sustainable technologies in different textile applications. The book systematically covers the history and chemistry of eco-friendly colorants, chitin, chitosan, cyclodextrin, biomordants, antimicrobial, UV protective, flame retardant, insect repellent textiles and advanced pre and post treatment technologies such as sonochemistry and plasma methods currently employed in functional modifications. The book also pays attention to the remediation of textile effluents using novel sustainable and inexpensive adsorbents. Written by high profile contributors with many years of experience in textile technology, the book gives engineers and materials scientists in the textile industry the information they need to effectively deploy these green technologies and processes. Introduces green chemistry and sustainable technologies and explores their role in different textile applications. Examines the use of renewable materials such as biopolymers, dyes and pigments, biomordants, polyphenols and plant extracts in functional finishing applications. Deals with the functional modification of textiles using state of the art biotechnology and nanotechnology. **Natural Dyes for Sustainable Textiles** Padma Shree Vankar, Dhara Shukla, 2023-09-05 *Natural Dyes for Sustainable Textiles* describes how manufacturing processes that are safer, more energy efficient and more sustainable can be achieved through the use of natural dyes. There are three main elements of sustainability: they are economic, social and environmental, and natural dyes can make a positive contribution to all three. A number of the textile industry's largest producers have adopted natural dyes as part of their bid to make their products more sustainable in response to consumer demand as well as their own consciousness of environmental issues. This unique book draws on the latest research to provide practical technical advice on

safer and greener processing of fabric minimizing the use of hazardous chemical dyes Details of preparation methods at stages including wet processing dyeing and effluent management are provided with specific information on how the methods improve efficiency as well as other advantages and limitations of each technology Provides case studies of how to switch from synthetic to natural dyes and what benefits resulted in real life Describes a practical chemical management system which involves natural dyes Examines use of high tech methods such as plasma and electron beam in textile surface modification
