management software has become as common as word processing software was five years ago But unlike word processors which are designed for single authorization and local storage content management systems are designed to accommodate large scale information production with many authors providing many different pieces of information kept in a web accessible database any piece of which might find its way into electronic documents that the author doesn't even know exist These software systems are complex to say the least and their impact on the field of writing will be immense Places of Redemption Mary McClintock Fulkerson, 2010-08-19 The primary aim of this book is to explore the contradiction between widely shared beliefs in the USA about racial inclusiveness and equal opportunity for all and the fact that most churches are racially homogeneous and do not include people with disabilities To address the problem Mary McClintock Fulkerson explores the practices of an interracial church United Methodist that includes people with disabilities The analysis focuses on those activities which create opportunities for people to experience those who are different as equal in ways that diminish both obliviousness to the other and fear of the other In contrast with theology's typical focus on the beliefs of Christians this project offers a theory of practices and place that foregrounds the instinctual reactions and communications that shape all groups The effect is to broaden the academic field of theology through the benefits of ethnographic research and postmodern place theory **Vernacular Architecture and Regional Design** Kingston Heath, 2009-06-04 A series of international case studies demonstrates the place of vernacular architecture in the design process for a wide selection of contemporary architects work Offers a clear analysis of the vernacular building tradition placing architecture in its social context Introduces a new socially and environmentally inspired approach to sustainable design *The Global Spanish Empire* Christine Beaule, John G. Douglass, 2020-05-05 The Spanish Empire was a complex web of places and peoples Through an expansive range of essays that look at Africa the Americas Asia the Caribbean and the Pacific this volume brings a broad range of regions into conversation The contributors focus on nuanced comparative exploration of the processes and practices of creating maintaining and transforming cultural place making within pluralistic Spanish colonial communities The Global Spanish Empire argues that patterned variability is necessary in reconstructing Indigenous cultural persistence in colonial settings The volume's eleven case studies include regions often neglected in the archaeology of Spanish colonialism The time span under investigation is extensive as well transcending the entirety of the Spanish Empire from early impacts in West Africa to Texas during the 1800s The contributors examine the making of a social place within a social or physical landscape They discuss the appearance of hybrid material culture the incorporation of foreign goods into local material traditions the continuation of local traditions and archaeological evidence of opportunistic social climbing In some cases these changes in material culture are ways to maintain aspects of traditional culture rather than signifiers of new cultural practices The Global Spanish Empire tackles broad questions about Indigenous cultural persistence pluralism and place making using a global comparative perspective grounded in the shared experience of Spanish colonialism Contributors Stephen Acabado Grace
