Thames Pleasure Steamers From 1945:

Thames Pleasure Steamers from 1945 Andrew Gladwell,2001 Thames Pleasure Steamers from 1945 **The Heyday of Thames Pleasure Steamers** Andrew Gladwell,2019-05-15 A nostalgic collection of illustrations that capture the golden era of pleasure steamers on the Thames Britain at War 1939-1945 Brian Williams,2005-04 This is a salute to those who fought in the forces and on many fronts recalling days of hardship and loss but also the forging of life long friendships and community spirit for which World War II will always be remembered Look out for more Pitkin Guides on the very best of British history heritage and travel specially more titles in this series More titles in the History of Britain Series Ancient Britain Invaders in Britain Elizabethan England Kings Queens Maritime Britain Medieval England Romans in Britain Tudor England Victorian Britain **River Medway Pleasure Steamers** Andrew Gladwell,2010-03-15 Andrew Gladwell brings the great days of pleasure steamers on the River Medway to life through a wonderful selection of images Pleasure Boating on the Thames Simon Wenham,2014-05-05 The River Thames above London underwent a dramatic transformation during the Victorian period from a great commercial highway into a vast conduit of pleasure Pleasure Boating on the Thames traces these changes through the history of the firm that did more than any other on the waterway to popularise recreational boating Salter Bros began as a small boat building enterprise in Oxford and went on to gain worldwide fame not only as the leading racing boat constructor but also as one of the largest rental craft and passenger boat operators in the country Simon Wenham s illustrated history sheds light on over 150 years of social change how leisure developed on the waterway including the rise of camping as well as how a family firm coped with the changes brought about by industrialisation a business that today still carries thousands of passengers a year *By Steamer to the Essex Coast* Andrew Gladwell,2012-07-15 The story of the pleasure steamer cruises along the Essex coast *British Coaster, 1939-1945* Great Britain. Central Office of Information,1947 *By Steamer to the Kent Coast* Andrew Gladwell,2013-01-15 From the dawn of steamer travel people were taking day trips to the coast Andrew Gladwell tells the story of steamers to the Kent coast **Ships Monthly** ,2002 Shipping on the Thames & the Port of London During the 1940s-1980s Malcolm Batten,Reg Batten,2022-05-05 During the 1970s and 1980s the Port of London and shipping on the River Thames was in a state of transition New methods of cargo handling in particular the introduction of containers and Roll on Roll off vehicle ferries called for new investment and a rethink on the way dock traffic was traditionally managed As a result The Port of London Authority decided to run down and close the various London docks and concentrate all new investment downriver at their Tilbury docks These photographs along with some from earlier decades and mostly previously unpublished are a fascinating insight into this period when traditional ships and cargo handling methods worked alongside the new technology Ships designed for carrying cargo in their holds were sometimes adapted to carry containers as deck cargo There were also shipping types now lost to history including colliers and sludge boats Not forgotten are the passenger ships cruise liners to ferries The various vessels that

served the port from tugs to salvage craft and floating cranes Finally the heritage craft from traditional Thames Sailing barges to former paddle steamers now adapted as floating pub restaurants Secret Twickenham, Whitton, Teddington and the Hamptons Andy Bull,2020-09-15 Secret Twickenham Whitton Teddington and the Hamptons explores the lesser known history of the South West London towns of Twickenham Whitton Teddington and the Hamptons through a fascinating selection of stories unusual facts and attractive photographs **British Pleasure Steamers, 1920-1939** Geoffrey Grimshaw,1945 The Bofors Gun Terry Gander,2013-04-30 The definitive history of this enduring and versatile anti aircraft weapon including many photos and drawings The 40mm Bofors gun first produced in the 1930s has become one of the most famous artillery pieces of all time It shows no sign of fading from the defense scene as in the second decade of the twenty first century it performs in many roles that were not contemplated by its original designers It has also proven to be so versatile that it is now allied to electronic and other technological marvels that were mere pipe dreams only a few years ago When the Bofors entered the international defense market its primary quarry the military aircraft was still a slow and fragile machine that could be terminally damaged by a single hit from a 40mm projectile Terry Gander describes this early period in the gun s development and he shows how despite recent increases in target speed and other performance parameters it can still inflict a one hit kill on almost any aircraft helicopter or guided missile Perhaps the most astonishing aspect of the story is that the fundamentals of today s Bofors guns remain virtually unchanged from the very first examples to come off the Karlskoga production line in Sweden In all its forms the Bofors continues to be a sound reliable and lethal piece of military hardware that has given good service to gunners all over the world Terry Gander s comprehensive account of the history of this remarkable weapon over the course of almost eighty years is fascinating reading and an invaluable work of reference for military historians and artillery specialists alike The Mariner's Mirror Bibliography for ... ,2003 *Dockers' Stories from the Second World War* Henry T. Bradford,2012-02-29 Dockers Stories from the Second World War is a collection of several true stories drawn from Henry Bradford s time as a Registered Docker in the Port of London Men were often killed and injured during their every day work on the docks nonetheless never was the bravery of these men so tested as during times of war Henry heard many stories from dockers in his time working the docks but it was their wartime adventures that seemed most vivid Henry Bradford s lively stories and colourful characters reveal the bravery of ordinary men in World War Two from Captain Jim Fryer s ship towage work on Calais roads and Dunkirk beaches and saving lives of survivors from the bombed hospital ship Paris for which he was awarded the DSC to Petty Officer Jack Hicks quieter but equally memorable posting steering a clinker built boat on a hush hush job from the Thames to the north east his crew consisting only of an inexperienced co man and an incredibly efficient WREN This book is sure to appeal to those whose relatives worked as dockers and to anyone with an interest in London s East End at war **The Thames, 1580-1980** Ben Cohen (F.R.C.S.),2008 An annotated bibliography of materials from the sixteenth through the twentieth century concerning the

Thames River in England Topics include floods bridges fishing frost fairs journals and river police alphabetically arranged in nineteen sections Reprint of the 1985 edition with the addition of an index Provided by publisher *Sea Breezes* ,2002

Evacuees Mike Brown,2005-10-31 As the last days of peace ebbed away in 1939 and the outbreak of the Second World War appeared inevitable a massive exodus took place in Britain nearly two million civilians most of them children were taken from the cities industrial towns and ports to the relative safety of the British countryside For many of these bewildered children this was the first time away from their families or even their own home town But for overseas British nationals evacuated to the mother country from the Channel Islands and Gibraltar the shock of the upheaval was great indeed Carrying pitifully few belongings they had no idea where they were being sent for many it was the beginning of a great adventure for some a nightmare Mike Brown combines factual narrative with contemporary eyewitness accounts and oral history extracts to investigate the phenomenon of evacuation in Britain during the Second World War Illustrated with a variety of contemporary photographs and ephemera *Evacuees* provides a fascinating amusing and sometimes disturbing glimpse of how children and adults coped with the trials and tribulations of evacuation It will appeal to anyone who is interested in reading about life on the Home Front during the Second World War and especially to anyone who was an evacuee *Essex Journal* ,1977

From War to Peace Nick Robins,2021-09-30 *From War to Peace* tells the story of the adaptation from White Ensign to Red Ensign and to flags of other nations of the numerous classes of naval ships mainly built during the two world wars and surplus to requirements with the advent of peace It also describes ships sourced from the United States Navy and elsewhere that were converted for commercial use The most successful classes to transfer to the merchant service were the Hunt class minesweepers of the Great War Landing Craft Tank the salvage tugs of World War Two and the wooden hulled Fairmile launches which became familiar at seaside resorts in the 1950s and 60s and of course the MFV classes that helped the fishing industry in the postwar years The story includes the successful commercial conversions of many of the Flower and Castle Class corvettes and River Class frigates notably the 1954 conversion of HMCS Stormont to a luxury yacht for the Greek shipping magnate Onassis It describes why HMS Charybdis became a passenger liner in the Great War and how HMS Albatross nearly became a luxury liner after World War Two but in fact was transformed into a very unpopular emigrant ship and ended her days as a floating casino based at Cape Town The author reveals the military antecedents of numerous commercial vessels that many would have thought were built especially for the service that they later maintained and it illustrates just how many Royal Navy vessels ended up in private ownership And the question is asked if the military had not built so many ships that were eminently suitable for commercial adaptation would the technical development of merchant shipping have progressed at a faster rate than it did The answer is a definite no and is illustrated in several ways It was former naval vessels that promoted the early development of the Ro Ro ferry former naval ships introduced numerous design innovations for example the raised foredeck common for so many years on salvage tugs and above all stripped of their

military hardware ex naval ships provided opportunities for modest investment where otherwise there would have been none
Copiously illustrated throughout the book tells a fascinating story of invention and ingenious ship conversion and of
pragmatic adaptation in the financially stringent years after two world wars
