That Childhood Country Deirdre Purcell, 1994 An irresistible love story by the acclaimed author of *A Place of Stones* where the cruel hand of fate destroys a newfound love A young man and woman s passionate beginnings are ruined by a terrible secret that their parents buried for nearly two decades      Childhood Country Richard Vaughn, 2007-02 A lonely boy s landscape encompasses the U S Middle West and California during the Great Depression 1930s through the World War II home front and late 1940s Broken shards of youthful memory rooming with strangers moving from place to place with sudden frequency and continual uncertainty because of poverty and a mother s marital failures Seen through a boy s eyes from six to sixteen here are children and adults in the throes of financial hardship and tumultuous wartime an empty house with deathly echoes relatives swept into the cataclysm of war a cousin gripped by suicidal grief a family betrayed and unexpected humor friendship hope and first love He escapes into movies comic books adventurous imagination with fantasy excursions and fascination with guns Through it all is his mother raised on dreams of a luxurious life but thwarted by doomed relationships as she searches for love and security when both are rationed or transient He lives an adolescence not knowing who he is or where he belongs as events propel him toward the looming horizon of manhood      *A Country Called Childhood* Jay Griffiths, 2015-11-10 While traveling the world in order to write her award winning book *Wild* Jay Griffiths became increasingly aware of the huge differences in how childhood is experienced in various cultures One central riddle in particular captured her imagination why are so many children in Euro American cultures unhappy and why is it that children in traditional cultures seem happier In *A Country Called Childhood* Griffiths seeks to discover why we deny our children the freedoms of space time and the natural world Visiting communities as far apart as West Papua and the Arctic as well as the UK and delving into history philosophy language and literature she explores how children s affinity for nature is an essential and universal element of childhood It is a journey deep into the heart of what it means to be a child and it is central to all our experiences young and old      **Country Profile of the Epidemiology and Clinical Management of Early Childhood**

**Caries** Morenike Oluwatoyin Folayan, Wael Sabbah, Maha El Tantawi, Francisco Ramos-Gomez, 2020-07-29      **Tumours in a Tropical Country** A. C. Templeton, 2012-12-06 The geography of medicine is a classical subject that can be studied wherever medicine is practised and the population counted It has already contributed a great deal to knowledge of the causes of disease and it might be thought that the subject had little more to teach This however is unlikely First there are many parts of the world that have only recently been provided with the full range of diagnostic services Secondly it is now realised that the observation that a disease occurs only very rarely under some conditions can be just as important as the observation that it occurs very often under others Thirdly the spread of industrialization has not yet eliminated the wide variety of conditions of life that has been produced by different cultures and different standards of living We have still an opportunity to determine their effect on the incidence of disease but not perhaps for long That an interest in the geography of cancer can pay

dividends is shown by many examples ranging from the relationships between cancer of the buccal cavity and chewing habits and between cancer of the lung and smoking to the current enquiries relating Burkitt's lymphoma to malaria cancer of the oesophagus to the consumption of maize beer cancer of the liver to food contaminated with aflatoxin and cancer of the large bowel to the dietary content of fibre and fat

*My Second-Favorite Country* Sivan Zakai, 2022-06-14 Reveals how young American Jewish children come to develop their views about Israel Israel has long occupied a prominent place in the lives and imaginations of American Jews serving as both a symbolic touchstone and a source of intercommunal conflict In *My Second Favorite Country* Sivan Zakai offers the first longitudinal study of how American Jewish children come to think and feel about Israel tracking their evolving conceptions from kindergarten to fifth grade This work sheds light on the perception of Israel in the minds of Jewish children in the US and provides a rich case study of how children more generally develop ideas and beliefs about self community nation and world In contrast to popular views of America's youth as naive or uninterested this book illuminates both the complexity of their thinking and their desire to be included in conversations about important civic and political matters Zakai draws from compelling empirical data to prove that children spend considerable effort contemplating the very concepts that adults often assume they are not ready to discuss Indeed the book argues that over the course of their elementary school education children develop and express deep interest in complex issues such as the intricacies of identity and belonging conflicting ways of framing the past and the demands of civic responsibility Ultimately Zakai argues that in order to take children's ideas seriously and better prepare them for a world full of disagreement a substantive shift in educational practices is necessary
