Challenging the Absolute Simon F. Oliai, 2014-12-30 Our contemporary world presents a seemingly inexplicable paradox It is a world where interaction among societies of different cultural traditions has never been easier A world in which modern technology has visibly overcome the physical barriers that had long condemned the majority of men to relative isolation from one another Yet our world is also one in which the illusion of a lost original cultural or religious identity grounded by a metaphysical absolute pits men against one another A physically more accessible world has thus become an increasingly fundamentalist one In this book written in the wake of such influential European thinkers as Nietzsche Heidegger Foucault Derrida and Vattimo Simon Oliai analyzes the conceptual underpinnings of this paradox and argues that unless the European affirmation of man's finite existence becomes universal we shall never rid ourselves to echo Nietzsche of the repressive shadow of a long dead metaphysical idol **pt. 1 At Los Angeles, Calif., August 7, 1934. Brains, Buddhas, and Believing Dan Arnold, 2014-04-08 Premodern Buddhists are sometimes characterized as veritable mind scientists whose insights anticipate modern research on the brain and mind Aiming to complicate this story Dan Arnold confronts a significant obstacle to popular attempts at harmonizing classical Buddhist and modern scientific thought since most Indian Buddhists held that the mental continuum is uninterrupted by death its continuity is what Buddhists mean by rebirth they would have no truck with the idea that

everything about the mental can be explained in terms of brain events Nevertheless a predominant stream of Indian Buddhist thought associated with the seventh century thinker Dharmakirti turns out to be vulnerable to arguments modern philosophers have leveled against physicalism By characterizing the philosophical problems commonly faced by Dharmakirti and contemporary philosophers such as Jerry Fodor and Daniel Dennett Arnold seeks to advance an understanding of both first millennium Indian arguments and contemporary debates on the philosophy of mind The issues center on what modern philosophers have called intentionality the fact that the mind can be about or represent or mean other things Tracing an account of intentionality through Kant Wilfrid Sellars and John McDowell Arnold argues that intentionality cannot in principle be explained in causal terms Elaborating some of Dharmakirti's central commitments chiefly his apoha theory of meaning and his account of self awareness Arnold shows that despite his concern to refute physicalism Dharmakirti's causal explanations of the mental mean that modern arguments from intentionality cut as much against his project as they do against physicalist philosophies of mind This is evident in the arguments of some of Dharmakirti's contemporaneous Indian critics proponents of the orthodox Brahmanical Mimamsa school as well as fellow Buddhists from the Madhyamaka school of thought whose critiques exemplify the same logic as modern arguments from intentionality Elaborating these various strands of thought Arnold shows that seemingly arcane arguments among first millennium Indian thinkers can illuminate matters still very much at the heart of contemporary philosophy

Complexity Perspectives on Language, Communication and Society Àngels Massip-Bonet, Albert Bastardas-Boada, 2012-10-13 The language communication society triangle defies traditional scientific approaches Rather it is a phenomenon that calls for an integration of complex transdisciplinary perspectives if we are to make any progress in understanding how it works The highly diverse agents in play are not merely cognitive and or cultural but also emotional and behavioural in their specificity Indeed the effort may require building a theoretical and methodological body of knowledge that can effectively convey the characteristic properties of phenomena in human terms New complexity approaches allow us to rethink our limited and mechanistic images of human societies and create more appropriate emotional cognitive dynamic and holistic models We have to enter into dialogue with the complexity views coming out of other more material sciences but we also need to take steps in the linguistic and psycho sociological fields towards creating perspectives and concepts better fitted to human characteristics Our understanding of complexity is different but not opposed to the one that is more commonly found in texts written by people working in physics or computer science for example The goal of this book is to extend the knowledge of these other more human or socially oriented perspectives on complexity taking account of the language and communication singularities of human agents in society Our
