That Other Place A Personal Account Of Breast Cancer:

That Other Place Penelope M. Williams,1993 What You Need to Know about Breast Cancer Pat Kelly,Mark Levine,1999 Breast cancer continues to occur at the alarming rate of 1 in 8 American women and 1 in 9 Canadian women Survival rates are improving however and four out of five women diagnosed with breast cancer are alive 5 years after their cancer is discovered Written with honest and compassion this book serves to enlighten and empower women with breast cancer and those who care about them by providing knowledge about all aspects of the disease What You Need to Know About Breast Cancer shows women who have been diagnosed with breast cancer how to take an active part in better understanding their diagnosis treatment and healing Breast Cancer Penelope Williams,2008-08-15 Nicole phoned very early one morning from her hospital bed It was still dark a February darkness that held no promise of spring or even of light I've joined your club Pen she said The club of course was breast cancer a club that is becoming less and less exclusive It will accept anyone as a member and not one not a single one ever wanted to join Breast Cancer Biography of an Illness is a book for women diagnosed with breast cancer who suddenly find themselves facing a multitude of personal decisions and for anyone who has been touched by the malevolent mystery of the disease A breast cancer survivor herself Penelope Williams has filled this gritty honest book with information research stories and hard won personal insights so crucial to living with and living past breast cancer **That Other Place** Penelope Williams,1996-07-25 In 1988 Penelope Williams was told she had breast cancer And with this pronouncement she found herself flung into a different world one with a reluctant citizenry and a frightening terrain That Other Place is an absorbing and utterly candid account of Penny's journey in this country Each stage of the journey provides an illuminating view on issues such as conventional cancer treatments research the mythical cancer personality cancer shibboleths and holistic mind body medicine This is a story written from a cancer patient's point of view The subject is grim and Penny is unflinching in describing the reality of the pain and terror on initial diagnosis and treatment the whole wrenching process of the change of perceptions lifestyle and goals The reader is taken on the roller coaster of emotions experienced in a world knocked out of focus by the blow of sudden perhaps terminal illness But there is also humour sometimes black sometimes liberating And there is emphasis on the bonds of support among cancer sufferers an empathy as important to the healing process as medical treatment In writing That Other Place Penny gained a measure of control over the dragon She concludes her story with words of honesty and courage knowing that self proclaimed cancer survivors lose their impact as role models when they die It is enough to say I am here and here is always the goal not a milestone to somewhere else **The Wounded Breast** Evelyne Accad,2001 A moving journey through the experience of breast cancer including the different approaches and treatments **Chemo This!** Patricia McBain-Roberts,2001 **A New Look at Breast Cancer** Sharon Batt,DES Action/Canada,1996 Negotiating Disease Barbara Clow,2001-09-20 Her detailed analysis of popular beliefs and behaviours reveals the compelling logic of personal decisions about health and

healing Experience and expectation not fear and ignorance shaped the health care choices of both cancer sufferers and the healthy public A close examination of three unconventional practitioners in Ontario demonstrates the importance and vitality of alternative medicine By presenting treatment options that were congenial and plausible to cancer sufferers these healers contested the authority of conventional medicine An investigation of government cancer care policy particularly the activities of Ontario's Commission for the Investigation of Cancer Remedies exposes the difficulties of defining legitimate health care and the limits of state support for the medical profession This is ultimately a book about who held power in medical encounters in the past With masterful assurance and a highly readable style Clow portrays the disputes between sufferers and healers practitioners and politicians and legislators and laity that coloured perceptions of medical authority and constrained the power of the profession

The Complete Breast Book June Engel, 1996 A guide to inform about breast health this book works to educate the average woman with detection and even prevention of breast cancer June Engel wrote The Complete Breast Book so that women can recognize lumpy tissue and make informative decisions if they have been diagnosed with breast cancer from surgical choices to hormone treatments radiation and the emotional physical aftermath

BIO JUNE ENGEL PHD is a biochemist and award winning medical writer who is regularly asked to comment on health and medical issues for television and radio She has written several health books including The Complete Canadian Health Guide and The Complete Allergy Book

The Voice of Breast Cancer in Medicine and Bioethics Mary C. Rawlinson, Shannon Lundeen, 2006-07-15 Few diseases have made more difference to our understanding of illness the relation of the patient to the physician and other health care professionals and the social context of disease than breast cancer Breast cancer activism has provided a model of public policy advocacy for women as well as for sufferers from other diseases and even in causes unrelated to health In many ways it has become emblematic of issues in women's health This volume offers a discursive analysis of breast cancer From multiple perspectives historical philosophical psychological socio political these essays explore the competing narratives that have made breast cancer a contested site It addresses debates about the autonomy of the patient in relation to the authority of the physician as well as the importance of patient narratives in understanding disease It analyzes the relation between the community and medical practice particularly with regard to the effect of breast cancer activists and feminists on the medical understanding and treatment of breast cancer And it questions the intersection of medical science with political institutions and agencies of public policy in determining priorities of research and strategies of treatment
