

The 1988 Peace Accords and the Future of South-western Africa

INTRODUCTION

In December 1988 the governments of South Africa, Angola and Cuba signed the accords that would lead to Namibian independence and the end of Cuban and South African military involvement in Angola. In even, by any standards, an impressive achievement. The accords undoubtedly constitute the most comprehensive regional peace settlement to be concluded in the past decade. The settlement capped 11 years of diplomacy and 40 years of international pressure on South Africa to relinquish control over Namibia, the 'last colony in Africa'. It also marked the formal end of a growing conventional war which had already engaged Cuban, Angolan and South African forces in bloody fighting along the Angolan-Namibian border.

The accords are important in themselves. An analysis of the process which brought them about reveals how the regional states dealt with new conflicts and with external powers in a high-stakes game involving secret understandings, military engagements and threat-mongering, intense diplomacy, negotiation and compromise and political courage, as well as eight months of hard bargaining. It also shows how domestic politics imposed constraints on all the participants and suggests that the outcome was by no means certain.

The major interest of the accords, however, lies in their impact on the future course of development in the region. They set in motion a series of events which have dramatically altered the security map of south-western Africa and the issues and opportunities facing the southern African states in the 1990s. The regional environment is most conducive to peaceful co-operation when, as was the case in the past two decades, it is in some way threatened, leaving some conflict, unresolved and menacing dangerously high expectations elsewhere. The disengagement of which would lead to increased political instability and a resurgence of conflict.

This study presents a critical analysis of the Angolan and Namibian conflicts and the 1988 peace accords. It analyses the events that made the settlement possible and the processes by which it was brought about. It presents the strengths and weaknesses of the accords themselves, and the problems in their implementation. Finally, it examines the important new developments that followed in the wake of the Namibian settlement, and how these events pose new problems and opportunities for southern Africa in the 1990s, particularly for relations between South Africa and the rest of the region.

While a common theme of the study is the interactions of outside states, particularly the superpowers, with local actors, superpower interests and policies in the region have been shaped more by developments in home-based elsewhere in the world than in southern Africa. This has important implications for the region in the new decade, as the numerous changes occurring in Europe and
