**States and Europe in the Global Arena** F. Burwell, I. Daalder, 1999-08-26 This book examines cooperation between the United States and Europe on a range of global issues. With the Soviet threat no longer a unifying factor, the transatlantic partners have sought a new basis for acting together in the post-Cold War era. The conditions and strategies that determine the success or failure of cooperation in restructuring relations with the East, countering the threat of weapons proliferation, dealing with so-called rogue states, and managing the global economy are explored. **An Employment-targeted Economic Program for South Africa** Robert Pollin, Gerald A. Epstein, Léonce Ndikumana, 2007-02-23 Investment in South Africa is low, real interest rates are high, the employment intensity of growth has been relatively slow. The employment-targeted program advocated in this book seeks to reverse these tendencies by lowering average interest rates and channeling subsidized credit to labor-intensive, pro-poor activities, particularly small-scale agriculture and small and medium-sized enterprises. This is a bold program, and by challenging conventional inflation-targeted economic policy, the book makes a major contribution to the debate on economic policy in South Africa. Keith B. Griffin, University of California, Riverside, US. The people of South Africa and the African National Congress-led government have made extraordinary social and economic advances since ending apartheid and beginning the transition to democracy in 1994. But the country still faces severe problems of mass unemployment, underemployment, and poverty. This study, sponsored by the United Nations Development Program, presents a detailed economic program designed to produce major reductions in unemployment and poverty and a general spreading of economic well-being, and to achieve these ends in a manner that is sustainable over a longer-term framework. **The**
