Stout, 2010-10-15. Dramatic story of World War II in the air. How the U.S. built an air force of 2.3 million men after starting with 45,000 and defeated the world's best air force. Vivid accounts of aerial combat. Winner 2011 San Diego Book Awards for Military Politics. In order to defeat Germany in World War II, the Allies needed to destroy the Third Reich's industry and invade its territory, but before they could effectively do either, they had to defeat the Luftwaffe, whose state-of-the-art aircraft and experienced pilots protected German industry and would batter any attempted invasion. This difficult task fell largely to the U.S., which at the outset lacked the necessary men, materiel and training. Over the ensuing years, thanks to visionary leadership and diligent effort, the U.S. Army Air Force developed strategies and tactics and assembled a well-trained force that convincingly defeated the Luftwaffe. **Day Fighters in Defence of the Reich** Donald Caldwell, 2012-02-27. A day-by-day account of Nazi air operations in WWII by the coauthor of *The Luftwaffe over Germany*, winner of an Air Force Historical Foundation Award. *Day Fighters in Defence of the Reich* is a detailed, comprehensive daily reference to the air operations flown by the Luftwaffe. During the Second World War, German air defenses struggled to cope with the threat posed by the American 8th and 15th Air Forces, which were charged with destroying Germany's critical war industries and wresting control of the air over the Reich from the Luftwaffe. This unique volume includes a brief narrative and a table of statistics detailing every mission of every Luftwaffe unit defending the Greater German Reich or the western occupied zone against strategic raids by the USAAF, tables of monthly sorties, losses and victory claims by the USAAF and the Luftwaffe over the Reich and the western occupied zone, and combat accounts by Luftwaffe pilots. This tremendous piece of work is based on documents in the German, American and British government archives and German pilot logbooks and interviews from the author's extensive collection. *Aeroplane Magazine* Caldwell is well known for his balanced presentations and the clarity of his writing. This book is a must-have for anyone with a serious interest in World War II aviation history. Highly recommended and quite likely to be remembered as one of the most important new books of the year.
