and Independent Agencies Appropriations,2005 The 2006 Federal Budget Charles M. Beach,Thomas A. Wilson,Michael Smart,2007 The 2006 federal budget was the first for a new Conservative minority government led by a prime minister from the west As a platform for implementing distinctive election promises the 2006 budget offered ample opportunity for rethinking fiscal priorities in Canada such as cutting the GST addressing fiscal imbalance with the provinces and finding a different approach to childcare and child benefits The papers in this volume examine the political and economic context informing the 2006 budget as well as lessons from recent U S tax policy debates and a quantitative evaluation of the impact of the overall budget package on the Canadian economy Special attention is devoted to alternative federal tax structures fiscal imbalance and the recent federal Blue Ribbon report Contributors also look at the new federal policy on childcare and child benefits how the budget relates to productivity and competitiveness and general sustainability of the new fiscal plan

Conflict and Peacebuilding in Sri Lanka Jonathan Goodhand,Benedikt Korf,Jonathan Spencer,2010-12-14 The period between 2001 and 2006 saw the rise and fall of an internationally supported effort to bring a protracted violent conflict in Sri Lanka to a peaceful resolution A ceasefire agreement signed in February 2002 was followed by six rounds of peace talks but growing political violence disagreements over core issues and a fragmentation of the constituencies of the key parties led to an eventual breakdown In the wake of the failed peace process a new government pursued a highly effective war for peace leading to the military defeat of the LTTE on the battlefields of the north east in May 2009 This book brings together a unique range of perspectives on this problematic and ultimately unsuccessful peace process The contributions are based upon extensive field research and written by leading Sri Lankan and international researchers and practitioners The framework of liberal peacebuilding provides an analytical starting point for exploring the complex and unpredictable interactions between international and domestic players during the war peace war period The lessons drawn from the Sri Lankan case have important implications in the context of wider debates on the liberal peace and post conflict peacebuilding particularly as these debates have largely been shaped by the high profile cases such as Kosovo Afghanistan and Iraq This book is of interest not only to Sri Lanka specialists but also to the wider policy practitioner audience and is a useful

Corruption and Post-Conflict Peacebuilding Dominik Zaum, Christine Cheng, 2012-02-20 This edited volume explores and evaluates the roles of corruption in post conflict peacebuilding The problem of corruption has become increasingly important in war to peace transitions eroding confidence in new democratic institutions undermining economic development diverting scarce public resources and reducing the delivery of vital social services Conflict affected countries offer an ideal environment for pervasive corruption Their weak administrative institutions and fragile legal and judicial systems mean that they lack the capacity to effectively investigate and punish corrupt behaviour In addition the sudden inflow of donor aid into post conflict countries and the desire of peacebuilding actors including the UN the international financial institutions aid agencies and non governmental organisations to disburse these funds quickly create incentives and opportunities for corruption While corruption imposes costs and compromises on peacebuilding efforts opportunities for exploiting public office can also be used to entice armed groups into signing peace agreements thus stabilising post war environments This book explores the different functions of corruption both conceptually and through the lens of a wide range of case studies It also examines the impact of key anti corruption policies on peacebuilding environments The dynamics that shape the relationship between corruption and the political and economic developments in post conflict countries are complex This analysis highlights that fighting corruption is only one of several important peacebuilding objectives and that due consideration must be given to the specific social and political context in considering how a sustainable peace can be achieved This book will be of great interest to students of peacekeeping and peacebuilding criminology political economy war and conflict studies international security and IR

Security and Hybridity after Armed Conflict Rens C. Willems, 2015-04-17 This book examines the dynamics of security provision in international interventions in post conflict states It focuses on how international security interventions such as Disarmament Demobilisation and Reintegration DDR programmes Security Sector Reform SSR and Armed Violence Reduction AVR play out in the post civil war context in which they are implemented The underlying assumptions of such interventions are that the state is the best placed to organise violence that the ideal state has to function as an organisation with the legitimate monopoly on the use of violence and that the primary task of the state is the provision of security Post civil war contexts however are characterised by hybridity in which various authority structures are overlapping cooperating and competing The interactions between different security actors both state and non state create struggles in society about whose security interests are promoted which actions to provide security are considered legitimate and about who is considered a legitimate security actor This book investigates the interactions between international actors organising and supporting security interventions and the local security dynamics created by the interactions between both state and non state actors involved in security It draws on extensive field research in Eastern Democratic Republic of Congo Burundi and South Sudan This book will be of much interest to students of statebuilding peacebuilding peace and conflict studies security studies and IR

Cebula,2006-01-01 Attiat Ott and Richard Cebula have recognised the need to present in an accessible and straightforward way the voluminous literature in the public economics arena Advances in econometric techniques and the spillover of knowledge from other disciplines made it difficult not only for students but also for lecturers to accurately find the information they need This major Companion addresses a wealth of

topics common to the study of both public economics and public choice including questions such as How does one structure the whole spectrum of public finance in a manageable framework What is Wagner's Law really about and what does empirical testing tell us How binding is the budget constraint How encompassing is a dictator's interest How do veto powers of the executive institutional structures and regimes affect public sector outcomes Do voters behave rationally Do conflicts yield benefits Is war cost effective and does secession offer a viable exit option The contributions both theoretical and empirical shed light on some contentious issues in the public economics literature and provide readers with insight into issues that are at the forefront of discussions about the public economy The empirical analysis utilizes recent econometric techniques to validate or refute empirical findings based on older vintage econometrics The diversity of coverage ranges from traditional models of the public economy to the incorporation of defence spending as a significant and often neglected function of the public sector The contributors include many pioneers and leading lights in the field The Elgar Companion to Public Economics will be required reading for academics and scholars at many levels in the fields of public economics and public choice but mainly graduate and above The Companion will also be of value to scholars in the wider social sciences in general and political science in particular
