The New Monastery:

Reforming the Monastery Greg Peters, 2013-11-12 Richard Froude wrote in 1833 to John Henry Newman that the present state of things in England makes an opening for reviving the monastic system. Seemingly original words at the time. Yet monasticism is one of the most ancient and enduring institutions of the Christian church, reaching its zenith during the High Middle Ages. Although medieval monasteries were regularly suppressed during the Reformation and the magisterial Reformers rejected monastic vows, the existence of monasticism has remained within the Reformation churches both as an institution and in its theology. This volume is an examination of Protestant theologies of monasticism, examining the thought of select Protestant authors who have argued for the existence of monasticism in the Reformation churches, beginning with Martin Luther and John Calvin and including Conrad Hoyer, John Henry Newman, Karl Barth, and Donald Bloesch. Looking at the contemporary church, the current movement known as the New Monasticism is discussed and evaluated in light of Protestant monastic history.

The Daoist Monastic Manual Livia Kohn, 2004-07-01 The *Fengdao kejie* or Rules and Precepts for Worshipping the Dao dates from the early seventh century and is a key text of medieval Daoist priesthood and monasticism, which was first formally organized in the sixth century. Compiled to serve the needs of both monastic practitioners and priests in training, it describes the fundamental rules, organizational principles, and concrete establishments of Daoist institutions. Speaking in their own voices and presenting the ideal Daoist life of their time, priests and recluses come to life in this fascinating ancient document. Livia Kohn here offers the first complete annotated translation of the *Fengdao kejie*. She begins with three introductory chapters that outline the development of Daoist organizations and institutions, discuss the date and compilation of the work, and present key issues of terminology and worldview. The text itself contains eighteen sections that address the importance of karma and retribution, the creation of buildings, sacred statues and scriptures, the design of sacred utensils and ritual clothing, the organization and structure of the ordination hierarchy, as well as a number of essential rituals, from the recitation of the scriptures to the daily devotions and the ordination ceremony. The *Daoist Monastic Manual* offers a clear and vibrant description of the lifestyle and organizational structures of medieval Daoism, rooting the religion in the concrete reality of daily activities.

A Monastic Landscape Dr Breda Lynch, 2010-11-05 This publication is primarily a study of the various aspects of the use and situation of the land held by the Cistercian order in medieval Leinster. A number of key topics form the central elements of this study. These include an examination of the physical landscape into which the Cistercian order settled and the changes that occurred within that landscape during the later medieval era. The book examines whether the location of the monasteries indicated any underlying nuances or if the monks were happy to settle wherever they were given land. The involvement of the Cistercian order in the agricultural and economic life of Leinster is also examined. A breakdown of the acreage and land type that the monasteries possessed is presented, and in the final section, the state of the monasteries immediately prior to the dissolution of the religious houses in the period 1536-41 is determined.

With regard to this final section the areas of interest are in relation to the physical remains of the monasteries the productivity or otherwise of the associated lands the organisation and location of that land and the general attitude of the Cistercian monks at that particular time in history There are many different areas of study that were examined These include the identification of the lands the land type and trends or differences in this type when compared with other parts of the country The organisation of the land and the uses of it in relation to the monastery are an essential aspect of the work and is possible to identify economic and social change by discussing the uses of that land The identification of granges and grange buildings was not originally intended as part of this work however research has allowed some evidence to emerge in relation to these buildings and is included In relation to the approach a short chapter outlining the origins of monasticism and the emergence of the Cistercian Order is included A brief outline of the governing rules of the Cistercians is included in chapter one as is a short discussion on the spread of the order up to its arrival in Ireland The second chapter is merely intended to give an idea of the pattern of the distribution of the Cistercian monasteries in Ireland Most of the information is in table form giving the monastery its location date of foundation and founder From this a number of observations are be made The principal area of study is Leinster therefore chapter three deals with this territory discussing its boundaries both internal and external and the kingdoms that made up medieval Leinster The fact that the monasteries of Leinster were situated in very well defined territories means that although the study is of Leinster as a whole these smaller somewhat independent units were still an important element in both the landscape and the social framework of the period As such it was necessary to ensure that each of these units was represented in any category of study The location of the monasteries is the focus of the second portion of chapter three Both the natural and man made features of the landscape are examined here The proximity of road and route ways to the monasteries has been mapped and discussed and any trends or patterns commented upon Chapter four deals with the monastic complex and the associated features It discusses the way in which the monastery and its lands were organised and the reasons for this This chapter deals more with the day to day requirements of the monks and indicates how both the land and the buildings within the complex were equally important and key elements in the functioning of the monasteries Following from chapter four and keeping earlier comments in mind the next portion of the work deals with other land that particular monasteries may have held at any time from foundation up to the time when the extents of the monastic possessions were drawn up Instead of looking

"Follow Me" Ivan J. Kauffman, 2009-01-01 From *The Very Beginning* there have been Christians who wanted to go all the way who rather than asking What must I do to be a Christian asked instead What can I do to be more Christian These highly intentional Christians have had an impact on the development of both Christianity and western civilization that has been completely out of proportion to their numbers The greatest impact of these Christians has come through the communities of like minded believers some of lay evangelicals and others of celibate monastics formed based upon their common desire to live more intentional Christian lives Throughout the past twenty centuries hundreds of groups of both kinds have formed This probing work tells the story of these communities both monastic and lay It is a story that though often overlooked is both inspiring and instructive Above all it is a story that opens the way for greater understanding between two groups of Christians who have long been estranged Protestant evangelicals and Catholic monastics Evangelicals are often accused of being ahistorical because we jump from Paul to Martin Luther without a pause to consider what the Spirit did in between But every Christian tradition finds some way to draw the line from Jesus to the present How we tell that story shapes who we are *Follow Me* tells the Christian story in a way that sparks my imagination and gets me excited about who the church is becoming in our post Christian era I hope every community of disciples will read it and ask How is God calling us to live the next chapter Jonathan Wilson Hartgrove author of *To Baghdad and Beyond How I Got Born Again in Babylon* Kauffman offers us a first installment on the kind of scholarship becoming possible thanks to the stereoscopic perspective of those who are learning to live on both sides of a great river that has long divided Christianity Unexpected though the news may be it is the very burden of Kauffman's book to show us why we should not have been surprised and would not be surprised if we read the history of Christianity looking for its broadest unifying patterns rather than for the basis of our separate identities He has done a service to historian ecumenist and renewal minded Christians alike by looking for the forest not just the trees surveying the lay of the land and marking the river that gives it life Gerald W Schlabach author of *Just Policing Not War An Alternative Response to World Violence*
