Sky Fever The Autobiography Of Sir Geoff:

Sky Fever Sir Geoffrey De Havilland, 1961 *Sky Fever: the Autobiography of Sir Geoffrey de Havilland, C.B.E.* Sir Geoffrey DE HAVILLAND, 1961 Sky Fever Geoffrey De Havilland, 1999-07-01 *The Man Who Built the Swordfish* Adrian Smith, 2018-04-30 Sir Richard Fairey was one of the great aviation innovators of the twentieth century His career as a plane maker stretched from the Edwardian period to the jet age he lived long enough to see one of his aircraft be the first to break the 1000mph barrier and at least one of his designs the Swordfish holds iconic status A qualified engineer party to the design development and construction of the Royal Navy's state of the art sea planes Sir Richard founded Fairey Aviation at the Admiralty's behest in 1915 His company survived post war retrenchment to become one of Britain's largest aircraft manufacturers The firm built a succession of front line aircraft for the RAF and the Fleet Air Arm including the iconic Swordfish In addition Fairey Aviation designed and built several cutting edge experimental aircraft including long distance record breakers between the wars and the stunningly beautiful Delta 2 which broke the world speed record on the eve of Sir Richard's death in 1956 Fairey also came to hold a privileged position in the British elite courting politicians and policymakers He became a figurehead of the British aviation industry and his successful running of the British Air Commission earned him a knighthood A key player at a pivotal moment Fairey's life tells us much about the exercise of power in early twentieth century Britain and provides an insight into the nature of the British aviation manufacturing industry at its wartime peak and on the cusp of its twilight years **Secret Warriors** Taylor Downing, 2015-04-15 World War I is often viewed as a war fought by armies of millions living and fighting in trenches aided by brutal machinery that cost the lives of many But behind all of this an intellectual war was also being fought between engineers chemists code breakers physicists doctors mathematicians and intelligence gatherers This hidden war was to make a positive and lasting contribution to how war was conducted on land at sea and in the air and most importantly life at home Secret Warriors provides an invaluable and fresh history of the World War I profiling a number of the key incidents and figures which lead to great leaps forward for the twentieth Century Told in a lively and colorful narrative style Secret Warriors reveals the unknown side of this tragic conflict **The Birth of Military Aviation** Hugh Driver, 1997 A survey of the development of British military aviation from 1903 to 1914 revealing the consequences of its annexation by the state as a branch of armaments as an underlying cause of aircraft inadequacies on the outbreak of war A mine of information drawing on an impressive range of archives It will become an important point of reference ENGLISH HISTORICAL REVIEW This book aims to demonstrate how the crisis evident in British military aviation in the early years of the First World War was inherent in the entire development of aviation in the years preceding the conflict After outlining the work of the early pioneers and the growth of an aviation industry as a branch of armaments Dr Driver considers the objectives of the War Office in increasingly seeking to divert design development to their research establishment at Farnborough He shows how the resultant virtual state monopoly in

design and procurement had disastrous consequences for aircraft innovation and development suffocating both competition and initiative and leading to the maintenance of inadequate aircraft by the Royal Flying Corps following the outbreak of war. The continuing dispute and its culmination in the Fokker Scourge controversy of 1915-1916 graphically characterise the strained development of military industrial relations in this area. Dr HUGH DRIVER gained an MA in War Studies from King's College London and a D Phil in modern history at Oriel College Oxford.

[A History of the Royal Navy: World War I](#) Mike Farquharson-Roberts, 2014-07-08 World War I is one of the iconic conflicts of the modern era. For many years the war at sea has been largely overlooked yet at the outbreak of that war the British Government had expected and intended its military contribution to be largely naval. This was a war of ideologies fought by and for empires. Britain was not defending simply an island; it was defending a far-flung empire. Without the navy such an undertaking would have been impossible. In many respects the Royal Navy fought along the longest front of any fighting force of the Great War and it acted as the leader of a large alliance of navies. The Royal Navy fought in the North and South Atlantic, in the North and South Pacific; its ships traversed the globe from Australia to England and its presence extended the war to every continent except Antarctica. Because of the Royal Navy Britain could finance and resource not only its own war effort but that of its allies. Following the naval arms race in the early 20th century both Britain and Germany were equipped with the latest naval technology including revolutionary new vessels such as dreadnoughts and diesel-powered submarines. Although the Royal Navy's operations in World War I were global, a significant proportion of the fleet's strength was concentrated in the Grand Fleet which confronted the German High Seas Fleet across the North Sea. At the Battle of Jutland in 1916 the Royal Navy under the command of Admiral Jellicoe fought an iconic if inconclusive battle for control of shipping routes. The navy might not have been able to win the war but as Winston Churchill put it, she could lose it in an afternoon. The Royal Navy was British power and prestige. 43,244 British navy personnel would lose their lives fighting on the seas in World War I. This book tells their story and places the Royal Navy back at the heart of the British war effort, showing that without the naval dimension the First World War would not have been a truly global conflict.
