How to Fracture a Fairy Tale Jane Yolen, 2018-11-05 This collection is Jane Yolen at her best This is magic Patricia C Wrede author of the Enchanted Forest Chronicles Fantasy icon Jane Yolen The Devil's Arithmetic Briar Rose Sister Emily's Lightship is adored by generations of readers of all ages Now she triumphantly returns with this inspired gathering of fractured fairy tales and legends Yolen breaks open the classics to reveal their crystalline secrets a philosophical bridge that misses its troll a spinner of straw as a falsely accused moneylender the villainous wolf adjusting poorly to retirement Each of these offerings features a new author note and original poem illuminating tales that are old new and brilliantly refined

information that is presupposed by speakers and addressees and a central concern of this book is with the notion of presupposition and with the interaction of compositional structure with discourse dynamics in the explanation of presuppositional phenomena Presupposed information includes background information both about the subject matter of a discourse and about the evolving discourse itself and about the attitudes of the participants in the discourse including who and where they are and what they agree and disagree about Stalnaker provides a way of representing self locating information that helps to explain how it can be shared and communicated and how it evolves over time He discusses the semantic and pragmatics of conditionals and epistemic modals and their role in representing agreement disagreement and the negotiation about how a context should evolve The book concludes with a discussion of the relations between contextualism and semantic relativism The Context and Content series is a forum for outstanding original research at the intersection of philosophy linguistics and cognitive science The general editor is Fran ois Recanati Institut Jean Nicod Paris
