The Constitution of Society Anthony Giddens, 1986-03-25 It is likely that this book will be regarded as the most important piece of grand sociological theory in English of the past decade Mark Poster University of California This book will take its place alongside such major statements of sociological theory as those of Parsons and Habermas Anyone interested in the state of the social sciences today the character of social theory or the relevance of philosophy to social theory will now find it

essential to grapple with Giddens's bold and incisive book Richard Bernstein Haverford College USA Anthony Giddens's new book is the fullest presentation yet of his theoretical views it has the lean sparse utterly serious craftsmanlike qualities we have learned to expect from its author and which make it a real pleasure to read Dennis Wrong Times Higher Education Supplement

Variation in Modern Standard Arabic in Radio News Broadcasts Mark van Mol, 2003 For this study a corpus linguistic approach was chosen requiring the compilation of a text corpus of radio news bulletins from linguistically very different countries Algeria Egypt and Saudi Arabia

The Freudian Slip Sebastiano Timpanaro, 2011-01-10 Philology cross examines Freud in this sustained critique of psychoanalysis and its foundational notion of the slip Challenging virtually every account of linguistic error in Freud's work as arbitrary and constrained Sebastiano Timpanaro advances an alternative picture keyed to the dynamics of banalization disimprovement and contextual play borrowed from the field of literary criticism Underscored with a Marxist defense of science against the professed materialism of the psychoanalytic individual drama Timpanaro's analysis demands a strong reassessment of the Freudian legacy and a renewed debate over its value for the Left

Psychosis Jozef Corveleyn, Paul Moyaert, 2003 These days a book on psychosis composed entirely of psychoanalytic contributions is a rarity It can create surprise that in what some have called the decade of the brain scholars on psychoanalysis psychiatry and psychology still continue to develop a project of understanding and explaining psychosis from a phenomenological and psychodynamic perspective And yet such a project not only continues to exist in spite of the dominance of the neuro biological model but elaborates itself self consciously in contradistinction to and even as a corrective to this model The contributors to this publication share the following concern The present day biologisation and neurologisation of psychiatry has dangerously de emphasized the concern with the individual suffering soul with the psyche in psychiatry But if this means a gain in the scientific status of psychiatry it is at the same time a loss for patients and practitioners alike Most of the contributions made to this volume build globally on the ideas of De Waelhens known for his studies in phenomenology on Heidegger and Merleau Ponty as well as for his phenomenological and psychoanalytical research in psychosis The limits of phenomenology as formulated by De Waelhens in the last chapter of his *La philosophie et les expériences naturelles* 1961 incited him to broaden the scope of his perspective to unravel the basic existential structures to Dasein it is necessary to study human existence in its vulnerability and it is exactly this vulnerability that breaks through in phenomena such as schizophrenia and paranoia

Ways of Thinking L. szlç Młr?, Viktor Młsz ros, 1990 This book goes right into the the causes and reasons of the diversity of ways of thinking It is about the tricks of how our thinking works and about the efforts and failures of artificial intelligence It discusses what can and cannot be expected of intelligent computers and provides an insight into the deeper layers of the mechanism of our thinking An enjoyable piece of reading this thought provoking book is also an exciting mental adventure for those with little or no computer competence at all

Experimentation with Human Beings Jay Katz, Alexander Morgan Capron, Eleanor Swift Glass, 1972-07-24 In recent years

increasing concern has been voiced about the nature and extent of human experimentation and its impact on the investigator subject science and society This casebook represents the first attempt to provide comprehensive materials for studying the human experimentation process Through case studies from medicine biology psychology sociology and law as well as evaluative materials from many other disciplines Dr Katz examines the problems raised by human experimentation from the vantage points of each of its major participants investigator subject professions and state He analyzes what kinds of authority should be delegated to these participants in the formulation administration and review of the human experimentation process Alternative proposals from allowing investigators a completely free hand to imposing centralized governmental control are examined from both theoretical and practical perspectives The conceptual framework of Experimentation with Human Beings is designed to facilitate not only the analysis of such concepts as harm benefit and informed consent but also the exploration of the problems raised by man's quest for knowledge and mastery his willingness to risk human life and his readiness to delegate authority to professionals and rely on their judgment
