**Intellectual Property and Innovation Management in Small Firms** Robert Blackburn, 2007 This text focuses on intellectual property management in small and medium sized enterprises from both a national and international perspective and considers the question in the context of innovation and knowledge management Industrial Innovation, Networks, and Economic Development Anant Kamath, 2014-11-27 This book offers an innovative examination of how low technology industries operate Based on extensive fieldwork in India the book fuses economic and sociological perspectives on information sharing by means of informal interaction in a low technology cluster in a developing country In doing so the book sheds new light on settings where economic relations arise as emergent properties of social relations This book examines industrial innovation and microeconomic network behaviour among producers and clusters perceiving knowledge diffusion to be a socially spatial as much as a geographically spatial phenomenon This is achieved by employing two methods simulation modelling and quantitative qualitative and historical social network analysis The simulation model based on its findings motivates two empirical studies one descriptive case and one network study of low tech rural and semi urban traditional technology clusters in Kerala state in southern India These cases demonstrate two contrasting stories of how social cohesion either supports or thwarts informal information sharing and learning This book pushes towards an economic sociology approach to understanding knowledge diffusion and technological learning which perceives innovation and learning as being more social processes than the mainstream view perceives them to be In doing so it makes a significant contribution to the literature on defensive innovation and the role of networks in technological innovation and knowledge diffusion as well as to policy studies of Indian small firm and traditional technology

Young,Ivan Teodorovi?,Peter Koveos,2002 To date the record of economic transition has decidedly been mixed The worldwide political climate is still in favor of economic reform and the process continues to have considerable momentum On the other hand this process now faces a number of formidable obstacles There appears to be general agreement that in many countries the promise of a better standard of living which economic transition offers to the mass of the citizenry has failed to produce the rapid and dramatic results hoped for There is an increasing conflict of interest between multinational firms and the national business community Moreover many transition economies have experienced a slowing of economic growth in real terms and social services have been severely cut This book deals with the development of those forces that have played a major role in the successes and failures of economic transition Its distinctive feature is that it does this from the perspective of economic political and social analysis taking into account both theoretical constructs and economic realities for those countries which have attempted the grand experiment with economic transition     *De Gruyter Handbook of SME Entrepreneurship* Marina Dabić,Sascha Kraus,2023-11-06 A small business is not a little big business Small and medium sized enterprises SMEs are considered the engines of worldwide economies and the main sources of job creation Management in these companies is different from management in larger older enterprises with their already established concepts and instruments In view of the high importance of SMEs in emerging developing and developed economies worldwide the De Gruyter Handbook of SME Entrepreneurship investigates the underlying mechanisms and practices of management within these companies with a focus on entrepreneurship growth and innovation It argues that it is time for a dedicated theory of SME Entrepreneurship to emerge Entrepreneurial thinking and behavior in SMEs must be

**Evolutionary Economic Geography in China** Canfei He, Shengjun Zhu, 2019-03-25 The book provides the first detailed account of the complex geographical dynamics restructuring China's manufacturing industries from the evolutionary economic geography perspective These geographical and industrial shifts have enormous implications in and beyond China for what is possible in the post crisis global economy The book demonstrates that the interface between evolutionary economic geography approaches and other approaches e.g global value chain global production network institutional economic geography could be a fertile area for further consideration The two main audiences that this book appeals to are economic geography and regional science The topics covered in the book are also relevant to development studies economics economic sociology and international studies offering academics international researchers post graduate and advanced undergraduate students in these fields an accessible grounded yet theoretically sophisticated account of the evolutionary economic geography in China and its interaction with firm performance and regional economic development The book is also attractive to national policy makers since it engages directly with economic and industrial policy issues such as industrial competitiveness regional and national development industrial and employment restructuring and trade regulation

**The Political Economy of Trust** Henry Farrell, 2009-08-24 Trust and cooperation are at the heart of the two most important approaches to comparative politics rational choice and political culture Yet we know little about trust's relationship to political institutions This book sets out a rationalist theory of how institutions and in particular informal institutions can affect trust without reducing it to fully determine expectations It then shows how this theory can be applied to comparative political economy and in particular to explaining inter firm cooperation in industrial districts geographical areas of intense small firm collaboration The book compares trust and cooperation in two prominent districts in the literature one in Emilia Romagna Italy and the other in Baden Württemberg Germany It also sets out and applies a theory of how national informal institutions may change as a

result of changes in global markets and shows how similar mechanisms may explain persistent distrust too among Sicilian Mafiosi

The Business of Networks Robert Huggins, 2020-08-26 This title was first published in 2000 The first book which brings together and interprets both the theoretical concepts associated with the study of networks in the business world and the policy applications being applied to the practical building and development of such networks It maps the changes in the culture of economic development policy that occurred in the UK during the 1990s incorporating a detailed assessment of the contribution that the Training and Enterprise Councils made to business support policies The book is published at a time when network and cluster building has risen to the top of economic development agendas not only in UK but in many countries throughout the world It offers the most detailed insight so far available into the structure motivations and processes involved in developing business networks through institutional intervention The book is relevant to anyone with an interest in business policy and theory
