United States. Department of Commerce and Labor,Charles Melville Pepper,1908      *The American Steam Locomotive in the  
Twentieth Century* Tom Morrison,2018-07-24 Between 1900 and 1950 Americans built the most powerful steam locomotives  
of all time enormous engines that powered a colossal industry They were deceptively simple machines yet the more their  
technology was studied the more obscure it became Despite immense and sustained engineering efforts steam locomotives  
remained grossly inefficient in their use of increasingly costly fuel and labor In the end they baffled their masters and as soon  
as diesel electric technology provided an alternative steam locomotives disappeared from American railroads Drawing on the  
work of eminent engineers and railroad managers of the day this lavishly illustrated history chronicles the challenges  
triumphs and failures of American steam locomotive development and operation      What I Saw on the West Coast of South
