Laurence,Stephen Stich,2008-01-10 This is the third volume of a three volume set on The Innate Mind The extent to which cognitive structures processes and contents are innate is one of the central questions concerning the nature of the mind with important implications for debates throughout the human sciences By bringing together the top nativist scholars in philosophy psychology and allied disciplines these volumes provide a comprehensive assessment of nativist thought and a definitive reference point for future nativist inquiry The Innate Mind Volume 3 Foundations and the Future concerns a variety of foundational issues as well as questions about the direction of future nativist research It addresses such questions

as What is innateness Is it a confused notion What is at stake in debates between nativists and empiricists What is the relationship between genes and innateness How do innate structures and learned information interact to produce adult forms of cognition e g about number and how does such learning take place What innate abilities underlie the creative aspect of language and of creative cognition generally What are the innate foundations of human motivation and of human moral cognition In the course of their discussions many of the contributors pose the question whether explicitly or implicitly Where next for nativist research Together these three volumes provide the most intensive and richly cross disciplinary investigation of nativism ever undertaken They point the way toward a synthesis of nativist work that promises to provide a powerful picture of our minds and their place in the natural order *Time After Time (A Good Morning America YA Book Club Pick)*
