*Robot Soccer* Vladan Papić, 2010-01-01 The idea of using soccer game for promoting science and technology of artificial intelligence and robotics was presented in the early 90s of the last century. Researchers in many different scientific fields all over the world recognized this idea as an inspiring challenge. Robot soccer research is interdisciplinary, complex, demanding, but most of all fun and motivational. Obtained knowledge and results of research can easily be transferred and applied to numerous applications and projects dealing with relating fields such as robotics, electronics, mechanical engineering, artificial intelligence, etc. As a consequence, we are witnesses of rapid advancement in this field with numerous robot soccer competitions and a vast number of teams and team members. The best illustration is numbers from the RoboCup 2009 world championship held in Graz Austria, which gathered around 2300 participants in over 400 teams from 44 nations. Attendance numbers at various robot soccer events show that interest in robot soccer goes beyond the academic and R D. RoboCup-97: Robot Soccer World Cup I Hiroaki Kitano, 1998-04-20 RoboCup is an international initiative devoted to advancing the state of the art in artificial intelligence and robotics. The ultimate long range goal is to build a team of robot soccer players that can beat a human World Cup champion team. This is the first book devoted to RoboCup. It opens with an overview section presenting the history of this young initiative, motivation, the overall perspectives and challenges, and a survey of the state of the art in the area. The technical paper section presents the state of the art of the interdisciplinary research and development efforts in details, essentially building on the progress achieved during the RoboCup 97 Workshop. The team description contributions discuss technical and strategic aspects of the work of the participating teams. RoboCup 2010: Robot Soccer
