Link, James T. Townsend, 2013-04-15 The plan for this volume emerged during the international Leipzig conference commemorating the centenary of the death of Gustav Fechner The contributors suggested that while many features of modern psychological theory were anticipated by Fechner many new theoretical approaches owe much more to him than often is realized As such they decided to honor Fechner by evaluating his own contribution to the founding of psychology and psychoanalysis by deepening the foundations of psychological theories of consciousness perception and choice and by using the analysis of time to create a new appreciation of constraints that bind mental processes together Thus this volume spans an extraordinary range of psychological topics from hermeneutics to the time quantum basis for mental processes in a way that would both amaze and delight Fechner Moreover the international reach of his pioneering ideas can be seen from the current locations of the contributors The span from Japan to the United States to Holland to Germany and to Israel provides a global measure of Fechner s scientific legacy Current Catalog National Library of Medicine (U.S.), 1982 First multi year cumulation covers six years 1965 70 *Issues in Person Perception* Mark Cook, 2021-09-17 Life becomes difficult for the judges of others when they are presented with a number of facts about someone which all point in different directions or which point in no direction at all Originally published in 1984 this volume brings together research on four major issues involved in judging people the relationship between person perception and personality inference from multiple cues methodology of measuring accuracy of perception and selection for employment These issues are not only of increasing importance in the study of psychology today they are also of central relevance to social and business conduct This edited collection will be a valuable resource for the student of either **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1982 **Stevens' Handbook of Experimental Psychology, Methodology in Experimental Psychology** John T.
