Institutional Context of Education Systems in Europe R.H. Hofman, W.H.A. Hofman, J.M. Gray, P. Daly, 2006-01-16 Based on empirical analysis using configuration theory and multi dimensional scaling this book provides insight into types of relationships that can be found between groups of countries with certain institutional context features

and into the quality and equity of their education system In this volume the authors take up the challenge of considering what a European settlement might look like In doing so they take into account worldwide trends and the increasing evidence of convergence across educational systems The outcomes of comparative analyses seem to suggest that strong education systems in terms of finance governance and choice could be preferable To a greater or lesser extent therefore all the systems of education currently in use in Europe face some common challenges The way in which these challenges are addressed will determine the future of these systems Key elements in the current debate that are considered in greater detail in this volume include changing views on a centre local relations with signs of an increasing commitment to decentralisation as a guiding principle for developing school governance b school autonomy which is now increasingly regarded as the engine room for school improvement especially in relation to sustaining it and c the celebration of community and school choice as a means of securing higher levels of parental involvement This volume will be of interest to researchers and practitioners working in education educational research and sociology of education It will also be of relevance to those interested in the comparison of various education systems and in governance funding of education and school choice

**Whither Socialism?** Joseph E. Stiglitz, 1996-01-31 The rapid collapse of socialism has raised new economic policy questions and revived old theoretical issues In this book Joseph Stiglitz explains how the neoclassical or Walrasian model the formal articulation of Adam Smith's invisible hand which has dominated economic thought over the past half century may have wrongly encouraged the belief that market socialism could work Stiglitz proposes an alternative model based on the economics of information that provides greater theoretical insight into the workings of a market economy and clearer guidance for the setting of policy in transitional economies Stiglitz sees the critical failing in the standard neoclassical model underlying market socialism to be its assumptions concerning information particularly its failure to consider the problems that arise from lack of perfect information and from the costs of acquiring information He also identifies problems arising from its assumptions concerning completeness of markets competitiveness of markets and the absence of innovation Stiglitz argues that not only did the existing paradigm fail to provide much guidance on the vital question of the choice of economic systems the advice it did provide was often misleading
