and essential to undertake a critical reassessment of the inclusive education agenda for this student group While policy frameworks may emphasize inclusion their real world translation often falls short leading to gaps between intention and realization Moreover the limited enactment of evidence based practices at school and classroom levels continue to impede student engagement and learning Furthermore there is a need to consider how inclusive education interfaces with the broader concepts of diversity equity and individualized learning The goal of this Research Topic is to explore these complex issues identify underlying barriers and promote strategies that can genuinely move inclusive education forward for students with SEN
