Library,1921 **The Good in Nature and Humanity** Stephen R. Kellert,Timothy Farnham,2013-04-10 Scientists theologians and the spiritually inclined as well as all those concerned with humanity s increasingly widespread environmental impact are beginning to recognize that our ongoing abuse of the earth diminishes our moral as well as our material condition Many people are coming to believe that strengthening the bonds among spirituality science and the natural world offers an important key to addressing the pervasive environmental problems we face The Good in Nature and Humanity brings together 20 leading thinkers and writers including Ursula Goodenough Lynn Margulis Dorion Sagan Carl Safina David Petersen Wendell Berry Terry Tempest Williams and Barry Lopez to examine the divide between faith and reason and to seek a means for developing an environmental ethic that will help us confront two of our most imperiling crises global environmental destruction and an impoverished spirituality The book explores the ways in which science spirit and religion can guide the experience and understanding of our ongoing relationship with the natural world and examines how the integration of science and spirituality can equip us to make wiser choices in using and managing the natural environment The book also provides compelling stories that offer a narrative understanding of the relations among science spirit and nature Grounded in the premise that neither science nor religion can by itself resolve the prevailing malaise of environmental and moral decline contributors seek viable approaches to averting environmental catastrophe and more positively to achieving a more harmonious relationship with the natural world By bridging the gap between the rational and the religious through the concern of each for understanding the human relation to creation The Good in Nature and Humanity offers an
