A Hidden History of Film Style is the first study to focus on the collaborations between directors and cinematographers a partnership that has played a crucial role in American cinema since the early years of the silent era Christopher Beach argues that an understanding of the complex director cinematographer collaboration offers an important model that challenges the pervasive conventional concept of director as auteur Drawing upon oral histories early industry trade journals and other primary materials Beach examines key innovations like deep focus color and digital cinematography and in doing so produces an exceptionally clear history of the craft Through analysis of several key collaborations in American cinema from the silent era to the late twentieth century such as those of D W Griffith and Billy Bitzer William Wyler and Gregg Toland and Alfred Hitchcock and Robert Burks this pivotal book underlines the importance of cinematographers to both the development of cinematic technique and the expression of visual style in film

*Transnational Cinematography Studies* Roberto Schaefer, Lindsay Coleman, Daisuke Miyao, 2016-12-27 Transnational Cinematography Studies introduces new perspectives to the discipline of film and media studies First this volume focuses on a crucial yet largely unexplored area in film and media studies the substantial communication between critical studies of cinema and film production practices This book integrates theories and practices of cinematographic technology Secondly Transnational Cinematography Studies expands the scope of film and media studies into the arena of transnationalism Cinema is now discussed in terms of globalization of audio visual cultures with regard to such issues as Hollywood film studios so called runaway productions and multi national co productions Hollywood remakes of Asian horror films or Hong Kong martial arts films and the growing significance of international film festivals However this volume proposes that globalization is not in itself new in the history of cinema and that cinema has always been at the forefront of transnational culture from the beginning of its history

From IBM to MGM Andrew Utterson, 2019-07-25 Andrew Utterson s unique study charts the beginnings of digital cinema addressing both how filmmakers used new digital technologies and how attitudes and anxieties about the rise of the computer were represented in films such as Lang s *Desk Set* Godard s *Alphaville* Kubrick s *2001 A Space Odyssey* and Crichton s *Westworld*
