Species Plantarum Facsimile Fir:

Biology and Biological Technology, 1986 *Flora Illustrata* New York Botanical Garden, 2014-01-01 Presents the history and significance of some of the most important works held by the renowned New York City library including handwritten manuscripts botanical artworks herbals explorer s notebooks and nineteenth century media Prospecting for Drugs in Ancient and Medieval European Texts David Holland, 1996-12-01 Classicists historians of medicine and working scientists collaborate to guide pharmaceutical researchers to the potential for rediscovering useful drugs from old texts They discuss the medicines of Greco Roman antiquity a case study of the 1570 This Booke of Sovereigne Medicines identifying plants in pre Linnaean botanical literature transforming plant lore into pharmacy and determining whether a treatment works Annotation copyrighted by Book News Inc Portland OR Botanophilia in Eighteenth-Century France R.L. Williams, 2013-03-09 The book describes the innovations that enabled botany in the Eighteenth century to emerge as an independent science independent from medicine and herbalism This encompassed the development of a reliable system for plant classification and the invention of a nomenclature that could be universally applied and understood The key that enabled Linnaeus to devise his classification system was the discovery of the sexuality of plants The book which is intended for the educated general reader proceeds to illustrate how many aspects of French life were permeated by this revolution in botany between about 1760 to 1815 a botanophilia sometimes inflated into botanomania The reader should emerge with a clearer understanding of what the Enlightenment actually was in contrast to some popular second hand ideas today

Species Plantarum, A Facsimile of the First Edition 1753 Carl Linnaeus, 1957 **An Atlas and Illustrated Guide to the Threatened and Endangered Vascular Plants of the Mountains of North Carolina and Virginia** J. R. Massey, 1983 *General Technical Report SE*, 1980 Linnaeus Wilfrid Blunt, 2001 William Stearn s appendix on Linnean classification provides a concise survey of the basics necessary for understanding Linnaeus s work BOOK JACKET Plant Variation and Evolution David Briggs, Stuart Max Walters, 1997-11-13 Considers how the study of variation in plants has developed over the last 300 years *Biodiversity, Evolution and Biogeography of Plants*, 1960 **Cognitive Foundations of Natural History** Scott Atran, 1993-01-29 Inspired by a debate between Noam Chomsky and Jean Piaget this work traces the development of natural history from Aristotle to Darwin and demonstrates how the science of plants and animals has emerged from the common conceptions of folkbiology *The Scenes of Inquiry* Nicholas Jardine, 2000 The Scenes of Inquiry advocates a radical shift of concern in philosophical historical and sociological studies of the sciences from answers and doctrines to questions and problems and explores the consequences of such a shift In his Conclusion Nicholas Jardine writes The time has come for scientists to break with science What started life as a creative programme liberating inquirers from limited scenes of inquiry has become itself a limitation on scenes of inquiry Freed of the mythology of science scientists might become more perceptive of their varied practices and of the workings of their own social and political institutions They

might recover their lost literary and aesthetic consciousness They might re engage in historical reflection Then we should surely see a wonderful proliferation and enrichment of the sciences and of the lived experience of all who partake in them Professor Jardine has expanded the book considerably for this paperback edition adding a substantial preface an extensive bibliography and three new essays which develop its themes and pursue its aims further These renew the book s interest and value for anyone interested in the workings of science and its role in our world Drawn from Life Victoria
