Palmer,2021-10-25 Bryan D Palmer reinterprets the history of labour and the left in the United States during the 1930s through a discussion of the emergence of Trotskyism in the most advanced capitalist country in the world Focussing on James P Cannon the founder of American Trotskyism Palmer builds on his previously published and award winning book *James P Cannon and the Origins of the American Revolutionary Left 1890 1928 2007* with a deeply researched and elegantly written study of Cannon and the Trotskyist movement in the United States from 1928 38 Situating this dissident communist movement within the history of class struggle both national and international Palmer examines how Cannon and others fought to revive a combative trade unionism thwart fascism and the drift to war refuse Stalinism s many degenerations and build a new Party and a new International both of which would be dedicating to reviving and realizing the possibilities of revolutionary socialism The result is a study that provides a definitive account of the largest and most influential Trotskyist movement in the world in the 1930s a mobilization whose history recasts understandings of the more extensively studied experience of United States working class militancy and the place of the Comintern affiliated Communist Party within it *U.S. Trotskyism 1928-1965. The Southern Key Michael Goldfield,2020-01-23 The golden key to understanding the last 75 years of American political development the eminent labor relations scholar Michael Goldfield argues lies in the contests between labor and capital in the American South during the 1930s and 1940s Labor agitation and unionization efforts in the South in the New Deal era were extensive and bitterly fought and ranged across all of the major industries of the region In *The Southern Key* Goldfield charts the rise of labor activism in each and then examines how and why labor organizers struggled so mightily in the region Drawing from meticulous and unprecedented archival material and detailed data on four core industries textiles timber coal mining and steel he argues that much of what is important in American politics and society today was largely shaped by the successes and failures of the labor movements of the 1930s and 1940s Most notably Goldfield shows how the broad based failure to organize the South during this period made it what it is today He contends that this early defeat for

labor unions not only contributed to the exploitation of race and right wing demagoguery in the South but has also led to a decline in unionization growing economic inequality and an inability to confront and dismantle white supremacy throughout the US A sweeping account of Southern political economy in the New Deal era The Southern Key challenges the established historiography to tell a tale of race radicalism and betrayal that will reshape our understanding of why America developed so differently from other advanced industrial nations over the course of the last century Marxism and Historical Practice (Vol. II) Bryan D. Palmer,2015-09-01 The two volumes of Marxism and Historical Practice bring together a wide range of essays written by one of the major Marxist historians of the last fifty years Collected in Volume II Interventions and Appreciations are articles and reviews capturing the breadth of Palmer s interests as a radical historian Cultural forms and representational productions are analysed political readings of historiography and pioneering historical practice provided Themes as diverse as the analytic and political contributions of Eric Hobsbawm and E P Thompson the conflicted legacies of American Trotskyism and the representation of class politics in Scorsese s Gangs of New York are covered Poverty in the United States Gwendolyn Mink,Alice M. O'Connor,2004-11-22 The first interdisciplinary reference to cover the socioeconomic and political history the movements and the changing face of poverty in the United States Poverty in the United States An Encyclopedia of History Politics and Policy follows the history of poverty in the United States with an emphasis on the 20th century and examines the evolvement of public policy and the impact of critical movements in social welfare such as the New Deal the War on Poverty and more recently the end of welfare as we know it Encompassing the contributions of hundreds of experts including historians sociologists and political scientists this resource provides a much broader level of information than previous highly selective works With approximately 300 alphabetically organized topics it covers topics and issues ranging from affirmative action to the Bracero Program the Great Depression and living wage campaigns to domestic abuse and unemployment Other entries describe and analyze the definitions and explanations of poverty the relationship of the welfare state to poverty and the political responses by the poor middle class professionals and the policy elite **American Book Publishing Record** ,1977-03-31 Here s quick access to more than 490 000 titles published from 1970 to 1984 arranged in Dewey sequence with sections for Adult and Juvenile Fiction Author and Title indexes are included and a Subject Guide correlates primary subjects with Dewey and LC classification numbers These cumulative records are available in three separate sets **Problems of Communism** ,1985 **Amiri Baraka and the Congress of African People** M. the opposition party not being accused of being communist by its opponents Where is the opposition which has not thrown this blightful communism accusation back to its reactionary adversaries as well as to the more progressive opposition parties Two things come out of this phenomenon I Communism itself has already been recognized as a force by all European powers II It is already time for the Communists to openly react to the whole world to publish their views their aims their tendencies and their Manifestos of the Party to this ghost of Communism THE BOOK in your hand not only reveals the historical direction of communism but also reveals an evolutionary history that extends to present and even to future years In this study discussed Ukraine Spain and Bolivia and so on the other small Countries how your current revolutionary mobility will shape this century in the recent times or near future EARLY HISTORY OF COMMUNISM So far history is the history of all societies class struggles Free people and slaves patriarchs and plebes gentlemen with serfs guild masters and kalfa one word one oppressed with oppression have always faced each other uninterrupted occasionally covered sometimes open Either by a totally revolutionary reestablishment of the society or by the collapse of the conflicting classes In earlier periods of history almost everywhere we find a complicated social order a wide range of social position grades in various clusters Patriarchs knights plebs slaves in ancient Rome From the serfs of the Middle Ages came the distinguished urbanites of the first cities The first items of the bourgeoisie also developed from these urbanites The discovery of America the circumnavigation of Cape of Good Hope opened new fields for the emerging bourgeoisie The East Indian and Chinese markets the colonization of America the exploitation of commerce the increase in the means of exchange and in general the commodities the commercial the shipping the industrial the unprecedented breakthrough and thus the rapid development of the revolutionary element of feudal society in its collapse The feudal industrial system in which industrial production was monopolized by closed lonces was no longer sufficient for the growing needs of new markets His manufacturing system took his place Guild master craftsmen were pushed to an edge by the middle class The division of labor between different guild units has disappeared in the face of the division of labor within each individual workshop Meanwhile the markets continued to grow steadily demand continued to rise steadily Even the builder was not enough anymore On top of that steam and machine revolutionized industrial production Manufuction took its place in the giant modern industry the industrial middle class the industrial millions the leaders of all industrial armies the modern bourgeoisie Modern industry has established a world market in which America has laid its foundations for exploration This market has made great progress in trade shipping and road transport This development also affected the spread of industry And the bourgeoisie has developed in the same direction in proportion to the expansion of industry commerce shipping and railways has increased its capital and has pushed all the classes from the Middle Ages into the background Translations from Kommunist ,1970 **A Classical Dictionary of Greek and Roman Biography, Mythology and Geography** William Smith,1904 **A Classical Dictionary of Greek and Roman Biography, Mythology and Geography, Based on the Larger Dictionaries** William Smith,1894 **New Perspectives**
