The background of the slide features a bright, glowing light source on the right side, from which numerous rays of light emanate, spreading outwards. The rays are depicted as sharp, elongated streaks of white and light blue, creating a sense of high speed and energy. The overall color palette is dominated by deep blues and blacks, with the bright white light source providing a strong contrast. The text is overlaid on this background in a bold, white, sans-serif font.

planetary orbits what Cassini ovals are to binaries The transition from a Bernoulli lemniscate to Cassini ovals is discussed in terms the instability criteria of Roche lobes and their fission When the second derivative of the curve is no longer constant the Newton inverse law does not apply and new central forces appear which can be derived from the radius of aberrancy just as the inverse square law follows from the radius of curvature The logarithmic spiral becomes periodic in velocity space and a new Hubble law appears between acceleration and velocity This has the effect of decreasing the decay rate of accelerations so that they can explain the flat rotational curvatures observed in spiral galaxies Numerical relativity has reduced its conception of general relativity to a Le Sage type theory thereby making it refutable Laser Experiments for Chemistry and Physics Robert N.
