Matthew Kaplan, Atsuko Kusano, Ichiro Tsuji, Shigeru Hisamichi, 1998-01-29 The intergenerational programming concept now garnering increased interest in America has been applied to Japanese society as a strategy for maintaining intergenerational and cultural continuity in the face of social and demographic changes While Japan is known for its enduring and resilient family structure which provides support for people of all ages the country's growing aged population combined with a trend away from three generation families and changing social values exposes a need for new mechanisms beyond the family to promote intergenerational communication support and cultural continuity The authors identify a rich geographically diverse set of intergenerational programs and activities that serve a wide range of human and community development objectives Beyond promoting intergenerational understanding among participants these initiatives function to help people to pursue their educational objectives arts and recreation interests desired states of health and welfare environmental preservation and community development goals and religious and spiritual well being Intergenerational endeavors constitute an integral approach for supplementing familial support systems and maintaining social cohesion in Japan as it enters the twenty first century **Roppongi Crossing**

Roman A. Cybriwsky, 2011 For most of the latter half of the twentieth century Roppongi was an enormously popular nightclub district that stood out from the other pleasure quarters of Tokyo for its mix of international entertainment and people It was where Japanese and foreigners went to meet and play With the crash of Japan's bubble economy in the 1990s however the neighborhood declined and it now has a reputation as perhaps Tokyo's most dangerous district a hotbed of illegal narcotics prostitution and other crimes Its concentration of bad foreigners many from China Russia and Eastern Europe West Africa and Southeast Asia is thought to be the source of the trouble Roman Adrian Cybriwsky examines how Roppongi's nighttime economy is now under siege by both heavy handed police action and the conservative Japanese construction state an alliance of large private builders and political interests with broad discretion to redevelop Tokyo The construction state sees an opportunity to turn prime real estate into high end residential and retail projects that will clean up the area and make Tokyo more competitive with Shanghai and other rising business centers in Asia Roppongi Crossing is a revealing ethnography of what is arguably the most dynamic district in one of the world's most dynamic cities Based on extensive fieldwork it looks at the interplay between the neighborhood's nighttime rhythms its emerging daytime

economy of office towers and shopping malls Japan's ongoing internationalization and changing ethnic mix and Roppongi Hills and Tokyo Midtown the massive new construction projects now looming over the old playground
