curriculum developers rely on the components of each definition that depict the richness of the field which in turn can provide a foundation for contemporary content concepts and creativity A curriculum is an anthology of learning experiences conceived and arranged based on a program s educational goals and the community s social forces Each curriculum manifests an image of what children ought to be and become Biber 1984 p 303 grounded on the awareness of social values and a system that interprets those values into experiences for learners The concept of curriculum as a distinctive domain of study within education arose from the demand to arrange organize and translate such awareness into educational programs of study It integrates the historical study of the goals and content of schooling analyses of curriculum documents and analyses of the children s experiences in school The first formal curriculum text was published in 1918 Bobbit 1918 although in the United States contemporary curriculum study goes back to the early 1890 s when lead committees challenged the form and structure of public schooling Presently curriculum development is fundamental at all educational levels **Tackling**
