Spell of the Tiger Sy Montgomery, 2016 **Spell of the Tiger: The Man-eaters of the Sundarbans** Sy Montgomery, 2002 *The Man-Eating Tigers of Sundarbans* Sy Montgomery, 2001 The forest around the Bay of Bengal is home to more tigers than anywhere in the world Readers can learn about their habitat and the myths that surround them

Spell of the Tiger Sy Montgomery, 2009-02-15 From the author of *The Soul of an Octopus* and bestselling memoir *The Good Good Pig* a book that earned Sy Montgomery her status as one of the most celebrated wildlife writers of our time *Spell of the Tiger* brings readers to the Sundarbans a vast tangle of mangrove swamp and tidal delta that lies between India and Bangladesh It is the only spot on earth where tigers routinely eat people swimming silently behind small boats at night to drag away fishermen snatching honey collectors and woodcutters from the forest But unlike in other parts of Asia where tigers are rapidly being hunted to extinction tigers in the Sundarbans are revered With the skill of a naturalist and the spirit of a mystic Montgomery reveals the delicate balance of Sundarbans life explores the mix of worship and fear that offers tigers unique protection there and unlocks some surprising answers about why people at risk of becoming prey might consider their predator a god

Tiger Bone & Rhino Horn Richard Ellis, 2013-02-22 In parts of Korea and China moon bears black but for the crescent shaped patch of white on their chests are captured in the wild and brought to bear farms where they are imprisoned in squeeze cages and a steel catheter is inserted into their gall bladders The dripping bile is collected as a cure for ailments ranging from an upset stomach to skin burns The bear may live as long as fifteen years in this state Rhinos are being illegally poached for their horns as are tigers for their bones thought to improve virility Booming economies and growing wealth in parts of Asia are increasing demand for these precious medicinals Already endangered species are being sacrificed for temporary treatments for nausea and erectile dysfunction Richard Ellis one of the world's foremost experts in wildlife extinction brings his alarm to the pages of *Tiger Bone Rhino Horn* in the hope that through an exposure of this drug trade something can be done to save the animals most direly threatened Trade in animal parts for traditional Chinese medicine is a leading cause of species endangerment in Asia and poaching is increasing at an alarming rate Most of traditional Chinese medicine relies on herbs and other plants and is

not a cause for concern Ellis illuminates those aspects of traditional medicine but as wildlife habitats are shrinking for the hunted large species the situation is becoming ever more critical One hundred years ago there were probably 100 000 tigers in India South China Sumatra Bali Java and the Russian Far East The South Chinese Caspian Balinese and Javan species are extinct There are now fewer than 5 000 tigers in all of India and the numbers are dropping fast There are five species of rhinoceros three in Asia and two in Africa and all have been hunted to near extinction so their horns can be ground into powder not for aphrodisiacs as commonly thought but for ailments ranging from arthritis to depression In 1930 there were 80 000 black rhinos in Africa Now there are fewer than 2 500 Tigers bears and rhinos are not the only animals pursued for the sake of alleviating human ills the list includes musk deer sharks saiga antelope seahorses porcupines monkeys beavers and sea lions but the dwindling numbers of those rare species call us to attention Ellis tells us what has been done successfully and contemplates what can and must be done to save these animals or sadly our children will witness the extinction of tigers rhinos and moon bears in their lifetime

Reading Contemporary South Asian Literature Bidhu Chand Murmu, Somjeeta Pandey, 2022-04-12 As a school of criticism the central argument in Postcolonial studies revolves around dismantling the dominant narrative of colonial or imperial history A colonization process not only captures the native people and culture but their lands too Proper reading of postcolonial theory would be by understanding the epistemology of colonized environment or vice versa Even after decolonization the ideology of imperialism is persistent in native memory and thought An embeddedness in native psyche not only nurtures imperialism but manifests them with the footprints of colonial masters In postcolonial countries the discourse of social and economic justice is deeply rooted in ecology As a consequence environmental activists from postcolonial nations tend to see any modern policy as a disguised form of neocolonialism or imperial dominance globalization and modernization Since the shocks of imperialism and globalization are most strongly felt in the third world countries most of them being former colonies this edited volume intends to explore texts by South Asian writers examining how these writers and their characters cope with the destruction of the environment This edited volume plans to seek out the writings of epistemological understanding of our environment Moreover the volume would also see a

Trout, 2011-11-15 In this illuminating and evocative exploration of the origin and function of storytelling the author goes beyond the work of

mythologist Joseph Campbell arguing that mythmaking evolved as a cultural survival strategy for coping with the constant fear of being killed and eaten by predators Beginning nearly two million years ago in the Pleistocene era the first stories Trout argues functioned as alarm calls warning fellow group members about the carnivores lurking in the surroundings At the earliest period before the development of language these rudimentary stories would have been acted out When language appeared with the evolution of the ancestral human brain stories were recited memorized and much later written down as the often bone chilling myths that have survived to this day This book takes the reader through the landscape of world mythology to show how our more recent ancestors created myths that portrayed animal predators in four basic ways as monsters as gods as benefactors and as role models Each incarnation is a variation of the fear management technique that enabled early humans not only to survive but to overcome their potentially incapacitating fear of predators In the final chapter Trout explores the ways in which our visceral fear of predators is played out in the movies where both animal and human predators serve to probe and revitalize our capacity to detect and survive danger Anyone with an interest in mythology archaeology folk tales and the origins of contemporary storytelling will find this book an exciting and provocative exploration into the natural and psychological forces that shaped human culture and gave rise to storytelling and mythmaking
