Texts And Their Transformations:

Tang Transformation Texts Victor H. Mair, 2020-10-26 This is the most comprehensive study of pien wen transformation texts i.e. tales of metamorphosis in any language since the manuscripts were discovered at the beginning of the 20th century in a remote cave complex in northwest China. They are the earliest written vernacular narratives in China and are thus extremely important in the history of Chinese language and literature. Numerous scholarly controversies have surrounded the study of the texts in the last three quarters of a century; this volume seeks to resolve some of them: the extent, origins and formal characteristics of the texts; the meaning of pien wen; the identity of the authors who composed these popular narratives; and the scribes who copied them; the relationship of the texts to oral performance; and the reasons for the apparently sudden demise of the genre around the beginning of the Sung dynasty. This is a multi-disciplinary study that integrates findings from religious, literary, linguistic, sociological and historical materials, carried out with intellectual rigor. It includes an extensive bibliography of relevant sources in many languages.

Paracelsus: The Man and his

Reputation, his Ideas and their Transformation Ole P. Grell, 2021-12-06 Despite his fame Paracelsus remains an illusive character As this volume points out it is somewhat of a paradox that the fascination with Paracelsus and his ideas has remained so widespread when it is born in mind that it is far from clear what exactly he contributed to medicine and natural philosophy But perhaps it is exactly this enigma which through the ages has made Paracelsus so attractive to such a variety of people who all want to claim him as an advocate for their particular ideas The first section of this book deals with the historiography surrounding Paracelsus and Paracelsianism and points to the need of reclaiming the man and his ideas in their proper historical context A further two sections are concerned with the different religious social and political implications of Paracelsianism and its medical and natural philosophical significance respectively *Victorian Transformations* Bianca Tredennick, 2016-02-24 Proposing the concept of transformation as a key to understanding the Victorian period this collection explores the protean ways in which the nineteenth century conceived of responded to and created change The volume focuses on literature particularly issues related to genre nationalism and desire For example the essays suggest that changes in the novel s form correspond with shifting notions of human nature in Victor Hugo s Notre Dame de Paris technical forms such as the villanelle and chant royal are crucial bridges between Victorian and Modernist poetics Victorian theater moves from privileging the text to valuing the spectacles that characterized much of Victorian staging Carlyle s Past and Present is a rallying cry for replacing the static and fractured language of the past with a national language deep in shared meaning Dante Gabriel Rossetti posits unachieved desire as the means of rescuing the subject from the institutional forces that threaten to close down and subsume him and the return of Adelaide Anne Procter s fallen nun to the convent in A Legend of Provence can be read as signaling a more modern definition of gender and sexuality that allows for the possibility of transgressive desire within society The collection concludes with an essay that shows neo Victorian authors like John Fowles and A S Byatt contending with the Victorian preoccupations with gender and sexuality **Textual Transformations in Children's Literature** Benjamin Lefebvre, 2013-01-04 This book offers new critical approaches for the study of adaptations abridgments translations parodies and mash ups that occur internationally in contemporary children s culture It follows recent shifts in adaptation studies that call for a move beyond fidelity criticism a paradigm that measures the success of an adaptation by the level of fidelity to the original text toward a methodology that considers the adaptation to be always already in conversation with the adapted text This book visits children s literature and culture in order to consider the generic pedagogical and ideological underpinnings that drive both the process and the product Focusing on novels as well as folktales films graphic novels and anime the authors consider the challenges inherent in transforming the work of authors such as William Shakespeare Charles Perrault L M Montgomery Laura Ingalls Wilder and A A Milne into new forms that are palatable for later audiences particularly when for perceived ideological or political reasons the textual transformation is not only unavoidable but entirely necessary Contributors consider the challenges inherent in transforming
