In Buddha's Company Richard A. Ruth, 2010-09-16 In *Buddha's Company* explores a previously neglected aspect of the Vietnam War the experiences of the Thai troops who served there and the attitudes and beliefs that motivated them to volunteer Thailand sent nearly 40 000 volunteer soldiers to South Vietnam to serve alongside the Free World Forces in the conflict but unlike the other foreign participants the Thais came armed with historical and cultural knowledge of the region Blending the methodologies of cultural and military history Richard Ruth examines the individual experiences of Thai volunteers in their wartime encounters with American allies South Vietnamese civilians and Viet Cong enemies Ruth shows how the Thais were transformed by living amongst the modern goods and war machinery of the Americans and by traversing the jungles and plantations haunted by indigenous spirits At the same time Ruth argues Thailand's ruling institutions used the image of volunteers to advance their respective agendas especially those related to anticommunist authoritarianism Drawing on numerous interviews with Thai veterans and archival material from Thailand and the United States Ruth focuses on the cultural exchanges that occurred between Thai troops and their allies and enemies presenting a Southeast Asian view of a conflict that has traditionally been studied as a Cold War event dominated by an American political agenda The resulting study considers such diverse topics as comparative Buddhism's alternative modernities consumerism celebrity official memories vs personal recollections and the value of local knowledge in foreign wars The war's effects within Thailand itself are closely considered demonstrating that the war against communism in Vietnam as articulated by Thai leaders was a popular cause among nearly all segments of the population Furthermore Ruth challenges previous assertions that Thailand's forces were merely America's mercenaries by presenting the multiple overlapping motivations for volunteering offered by the soldiers themselves In *Buddha's Company* makes clear that many Thais sought direct involvement in the Vietnam War and that their participation had profound and lasting effects

on the country's political and military institutions, royal affairs, popular culture, and international relations. As one of only a handful of academic histories of Thailand in the 1960s, it provides a crucial link between the keystone studies of the Phibun Sarit years (1946-1963) and those examining the turbulent 1970s. *Material Culture and Asian Religions* Benjamin Fleming, Richard Mann, 2014-03-26

Traditionally, research on the history of Asian religions has been marked by a bias for literary evidence, privileging canonical texts penned in classical languages. Not only has a focus on literary evidence shaped the dominant narratives about the religious histories of Asia in both scholarship and popular culture, but it has contributed to the tendency to study different religious traditions in relative isolation from one another. Today, moreover, historical work is often based on modern textual editions and increasingly on electronic databases. What may be lost in the process is the visceral sense of the text as artifact, as a material object that formed part of a broader material culture in which the boundaries between religious traditions were sometimes more fluid than canonical literature might suggest. This volume brings together specialists in a variety of Asian cultures to discuss the methodological challenges involved in integrating material evidence for the reconstruction of the religious histories of South, Southeast, Central, and East Asia. By means of specific test cases, the volume explores the importance of considering material and literary evidence in concert. What untold stories do these sources help us to recover? How might they push us to reevaluate historical narratives traditionally told from literary sources? By addressing these questions from the perspectives of different subfields and religious traditions, contributors map out the challenges involved in interpreting different types of data, assessing the problems of interpretation distinct to specific types of material evidence (e.g., coins, temple art, manuscripts, donative inscriptions) and considering the issues raised by the different patterns in the preservation of such evidence in different locales. Special attention is paid to newly discovered and neglected sources to our evidence for trade, migration, and inter-regional cultural exchange, and to geographical locales that served as contact zones connecting cultures. In addition, the chapters in this volume represent the rich range of religious traditions across Asia, including Hinduism, Buddhism, Taoism, Shinto, and Chinese religions, as well as Islam and eastern Christianities. **Thailand** Timothy D. builds a case for interpreting modern Thai Buddhist practice through the movements of these transformative figures He follows embodiments of the ghost and monk in a variety of genres and media including biography drama ritual art liturgy film television and the Internet Sourcing nuns monks laypeople and royalty McDaniel shows how relations with these figures have been instrumental in crafting histories and modernities particularly local conceptions of being Buddhist and the formation and transmission of such identities across different venues and technologies *Capitalism Magic Thailand* Peter A Jackson,2021-12-13 By studying intersections among new cults of wealth ritually empowered amulets and professional spirit mediumship which have emerged together in Thailand's dynamic religious field in recent decades *Capitalism Magic Thailand* explores the conditions under which global modernity produces new varieties of enchantment Bruno Latour's account of modernity as a condition fractured between rationalizing ideology and hybridizing practice is expanded to explain the apparent paradox of new forms of magical ritual emerging alongside religious fundamentalism across a wide range of Asian societies In Thailand novel and increasingly popular varieties of ritual now form a symbolic complex in which originally distinct cults centred on Indian deities Chinese gods and Thai religious and royal figures have merged in commercial spaces and media sites to sacralize the market and wealth production Emerging within popular culture this complex of cults of wealth amulets and spirit mediumship is supported by all levels of Thai society including those at the acme of economic and political power New theoretical frameworks are presented in analyses that challenge the view that magic is a residue of premodernity placing the dramatic transformations of cultic ritual centre stage in modern Thai history It is concluded that modern enchantment arises at the confluence of three processes neoliberal capitalism's production of occult economies the auraticizing effects of technologies of mass mediatization and the performative force of ritual in religious fields where practice takes precedence over doctrine **Becoming the Buddha** Donald K.
