That Familiar Touch:

That Familiar Touch Dara Joy,2004-01-01 The Art of Touch Joan Schweighardt,Faye Rapoport DesPres,2023-11 In The Art of Touch Prose and Poetry from the Pandemic and Beyond the unique voices of thirty nine of some of the most creative thinkers of our times have been brought together to consider the profound impact of one of our five main senses touch Psychologists healers massage therapists academics creative writers and others reflect on or tell personal stories about what it means to be able to touch or experience touch or to have to go without it as so many did and still do because of the COVID 19 pandemic They explore how transmissions such as texting may impede opportunities for touch while those like Zoom may make it possible for people who otherwise might be left behind to stay in touch From the experience of touching beloved animals to the life changing ways in which books and performances can touch us virtually all aspects of touch are acknowledged in these pages The Out-of-Sync Child Grows Up Carol Stock Kranowitz,2016-05-24 The long awaited follow up to the million copy bestseller The Out of Sync Child presenting information and advice for tweens teens and young adults living with Sensory Processing Disorder and their parents The Out of Sync Child Grows Up will be the new bible for the vast audience of parents whose children already diagnosed with Sensory Processing Disorder are entering the adolescent tween and teen years as well as those who do not yet have a diagnosis and are struggling to meet the challenges of daily life This book picks up where The Out of Sync Child left off offering practical advice on living with SPD covering everyday challenges as well as the social and emotional issues that many young people with SPD face Topics include strategies for coping with the sensory aspects of grooming social lives and dating playing sports and music and other issues as well as how to find support and help from loved ones occupational therapy and other resources Carol Kranowitz s insights are supplemented by first person accounts of adolescents and teens with SPD sharing their experiences and hard won lessons with readers and adding a powerful personal dimension to the book Cortical Visual Impairment Christine Roman-Lantzy,2007 The current leading cause of visual impairment among children is not a disease or condition of the eyes but cortical visual impairment CVI also known as cerebral visual impairment in which visual dysfunction is caused by damage or injury to the brain The definition nature and treatment of CVI are the focus of great concern and widespread debate and this complex condition poses challenges to professionals and families seeking to support the growth and development of visually impaired children On the basis of more than 30 years experience in working with hundreds of children of all ages with CVI Christine Roman Lantzy has developed a set of unique assessment tools and systematic targeted principles whose use has helped children learn to use their vision more effectively This one of a kind resource provides readers with both a conceptual framework with which to understand working with CVI and concrete strategies to apply directly in their work **Touch Screen Tablets Touching Children's Lives** Joanne Tarasuik,Gabrielle Strouse,Jordy Kaufman,2018-02-28 Touch screen tablets have greatly expanded the technology accessible to preschoolers toddlers and even infants given that they do not require the fine motor skills

required for using traditional computers Many parents and educators wish to make evidence based decisions regarding young children s technology use yet technological advancements continue to occur faster than researchers can keep up with Accordingly despite touch screen tablets entering society more than 5 years ago we are in the infancy of research concerning interactive media and children The topic has gained traction in the past couple of years For example theoretical papers have discussed how interactive media activities differ from physical toys and passive media Christakis 2014 and how educational apps development should utilise the four pillars of learning Hirsh Pasek et al 2015 Yet there has been little experimental research published on young children and touch screen use
