soccer is truly the world s game It evokes the deepest emotions in the millions who play and watch it in almost every corner

and culture around our globe So where does this passion come from Some of it is certainly inherent in genes especially in respect of playing ability However millions who have never played at any serious level are amongst the most fanatical of all Like most addictions it is something formed by steady consumption over a prolonged period Alcohol nicotine and cocaine have much more obvious routes to our bloodstream but I firmly believe that soccer can get there too It can ultimately provide such an overwhelming sensation of joy that the brain craves repetition of that euphoria even if it may have to wait thirty years or more between very brief highs Here s a true life story which provides a detailed insight into the environment and twists of fate which contrive to addict one Scottish boy and sustain that addiction even when he moves to America They have soccer in America Oh yeah more than you can imagine
