Quaestio Subtilissima Desmond Paul Henry, 1984 Dictionary of Twentieth-Century British Philosophers Stuart Brown, Hugh Terence Bredin, 2005-08-01 No Marketing Blurb **The Physics of Duns Scotus** Richard Cross, 1998 This text contains detailed discussion and analysis of Dun Scotus's accounts of the nature of matter and the structure of material substance His views on these matters are sophisticated and highly original **Individuality** Jorge J. E. Gracia, 1988-01-01 The author begins by distinguishing six fundamental issues on the metaphysics of individuality He then proceeds to examine the relation among these issues and to demonstrate that ignorance of the interrelationships has caused confusion in philosophy In spite of the intricacy of the subject matter the discussion is always clear the arguments explicitly evaluated and the solutions original In addition Gracia has assembled an array of historical and contemporary information from Plato to Strawson that is unavailable elsewhere Discourses of Power Carol Poster, Richard J. Utz, 1999 Northwestern University Press is pleased to announce the release of a new volume in its journal addressing late medieval culture ca 1300 1550 Discourses of Power Grammar and Rhetoric in the Middle Ages provides an exhaustive treatment of its subject by scholars representing various nations approaches and disciplines Supported by a multinational editorial board the editors have selected scholarly articles inclusive review essays and an extensive bibliography *De Ortu Grammaticae* Geoffrey L. Bursill-Hall, Sten Ebbesen, E.F.K. Koerner, 1990-01-01 The Danish scholar Jan Pinborg 1937 1982 made outstanding contributions to our understanding of medieval language study The papers in this volume clearly demonstrate the wealth of Pinborg's scholarly interests and the extent of his influence Though centered on medieval theories of grammar and language the collection ranges in time from the fourth century B C to the seventeenth century A D theories of the pronoun of mental language of supposition of figurative expressions and of mereology are among the topics discussed and the papers deal with both humble anonymous teachers of grammar and with such well known men as Aristotle Plotinus Augustine Peter of Spain Roger Bacon Robert Kilwardby Thomas Aquinas Dante William of Ockham Domingo de Soto and Suarez The papers are in English German or French **Anselm of Canterbury**, 2024-12-16 This volume explores important aspects of the life and writings of Anselm of Canterbury His is a world in which the created order with its hierarchies of natures and roles manifests a divine order that proceeds from the divine nature Individual chapters examine Anselm's understanding of rectitude truth justice and redemption the relationship of free will and grace and of faith and reason whether and how we can speak of or reject the divine Anselm's approach to death his understanding of the superiority of monasticism in the social and spiritual order and the role that angels play in his metaphysical and theological arguments *Methods and Methodologies*, 2010-11-26 *Methods and Methodologies* explores two questions about studying the Aristotelian tradition of logic The first addressed by the chapters on methods in the first half of the book is directly about the medieval logical commentaries treatises and handbooks How did medieval authors in the different traditions Latin and Arabic go about their work on

Aristotelian logic In particular how did they themselves conceive the relationship between logic and other branches of philosophy and disciplines outside philosophy The second question is about methodologies the subject of the chapters in the second half of the book it invites writers to reflect on their own and their colleagues practice as twenty first century interpreters of this medieval writing on Aristotelian logic Contributors are Sten Ebbesen Christopher J Martin Christophe Erismann Andrew Arlig Simo Knuuttila Amos Bertolacci Jennifer Ashworth Paul Thom Gyula Klima Matteo di Giovanni and Margaret Cameron

On the Medieval Theory of Signs Umberto Eco, Costantino Marmo, 1989-01-01 In the course of the long debate on the nature and the classification of signs from Boethius to Ockham there are at least three lines of thought the Stoic heritage that influences Augustine Abelard Francis Bacon the Aristotelian tradition stemming from the commentaries on De Interpretatione the discussion of the grammarians from Priscian to the Modistae Modern interpreters are frequently misled by the fact that the various authors regularly used the same terms Such a homogeneous terminology however covers profound theoretical differences The aim of these essays is to show that the medieval theory of signs does not represent a unique body of semiotic notions there are diverse and frequently alternative semiotic theories This book thus represents an attempt to encourage further research on the still unrecognized variety of the semiotic approaches offered by the medieval philosophies of language

The Routledge Handbook of Essence in Philosophy Kathrin Koslicki, Michael J. Raven, 2024-05-15 Essences have been assigned important but controversial explanatory roles in philosophical scientific and social theorizing Is it possible for the same organism to be first a caterpillar and then a butterfly Is it impossible for a human being to transform into an insect like Gregor Samsa does in Kafka's The Metamorphosis Is it impossible for Lot's wife to survive being turned into a pillar of salt Traditionally essences or natures have been thought to help answer such central questions about existence identity persistence and modality These questions are not only of great philosophical interest they also are of great interest to society at large This Handbook surveys the state of the art on essence Core issues about essence are discussed in 33 chapters all of them written exclusively for this volume by leading experts They are organized into the following four major parts each with its own introduction that provides a summary and comparison of the part's chapters History Essence and Essentialisms Themes and Variations Applications Anti Essentialist Challenges The volume is accessible enough for students while also providing enough details to make it a valuable reference for researchers While the notion of essence has been targeted for sustained criticisms since antiquity recent work has renewed interest in the topic This Handbook explains and synthesizes much of this current interest placing essence within its historical context and drawing connections to many contemporary areas of philosophy as well as to scholarly work in other disciplines With cross references in each chapter and a comprehensive index The Routledge Handbook of Essence in Philosophy is a useful resource and essential reading for anyone whether in or out of academic philosophy seeking clarification on one of philosophy's most distinctive and notorious notions

Judgement and the Epistemic Foundation of Logic Maria van der Schaar, 2012-11-28

This compelling reevaluation of the relationship between logic and knowledge affirms the key role that the notion of judgement must play in such a review. The commentary repatriates the concept of judgement in the discussion banished in recent times by the logical positivism of Wittgenstein, Hilbert and Schlick and the Platonism of Bolzano. The volume commences with the insights of Swedish philosopher Per Martin Löf, the father of constructive type theory for whom logic is a demonstrative science in which judgement is a settled feature of the landscape. His paper opens the first of four sections that examine in turn historical philosophical assessments of judgement and reason, their place in early modern philosophy, the notion of judgement and logical theory in Wolff, Kant and Neo-Kantians like Windelband, their development in the Husserlian phenomenological paradigm and the work of Bolzano, Russell and Frege. The papers whose authors include Per Martin Löf, Göran Sundholm, Michael Della Rocca and Robin Rollinger represent a finely judged editorial selection highlighting work on philosophers exercised by the question of whether or not an epistemic notion of judgement has a role to play in logic. The volume will be of profound interest to students and academicians for its application of historical developments in philosophy to the solution of vexatious contemporary issues in the foundation of logic.

Chaucerian Realism Robert Myles, 1994 Myles challenges the convention of the medieval mind and perceives new semantic sophistication in Chaucer's language.

Speculative Grammar, Universal Grammar, Philosophical Analysis Dino Buzzetti, Maurizio Ferriani, 1987-01-01 This volume brings together papers originally presented at a seminar series on Speculative Grammar, Universal Grammar and Philosophical Analysis held at the University of Bologna in 1984. The seminars aimed at considering various aspects of the interplay between linguistic theories on the one hand and theories of meaning and logic on the other. The point of view was mainly historical but a theoretical approach was also considered relevant. Theories of grammar and related topics were taken as a focal point of interest; their interaction with philosophical reflections on languages was examined in presentations dealing with different authors and periods ranging from the Middle Ages to the present day.

New Readings of Anselm of Canterbury's Intellectual Methods, 2022-01-31 These essays present new readings of Anselm's speculative and spiritual writings on topics including his relationship to Augustine, proofs for God's existence, faith and reason, human freedom and the problem of evil, his spiritual meditations and prayers as well as Anselm's reception by 19th and 20th century thinkers, modernism and feminism. These philosophical, theological and literary analyses bring fresh perspectives on Anselm both in his historical context and in dialogue with contemporary questions. Contributors are Tomas Ekenberg, Riccardo Fredriga, Emery de Gail, Kyle Philip Hubbard, Maggie Ann Labinski, Roberto Limonta, Ian Logan, Gavin Ortlund, M. B. Pranger, Gregory B. Sadler, Kevin Staley, Karen Sullivan, Eileen C. Sweeney, Michael Vendsel, Luca Vettorello, James Wetzell and Kevin White. See inside the book.

Latinos in America Jorge J. E. Gracia, 2008-04-30 A first of its kind book that seriously and profoundly examines what it means philosophically to be Latino and where Latinos fit in American society. Offers a fresh perspective and clearer understanding of Latin American thought and culture, rejecting answers based on stereotypes and fear. Takes an

interdisciplinary approach to the philosophical social and political elements of Hispanic Latino identity touching upon anthropology history cultural studies and sociology as well as philosophy Written by Jorge J E Gracia one of the most influential thinkers of Hispanic Latino descent Metaphysical Alternatives vs. Alternative Semantics Alex Hall, Gyula Klima, Timothy Kearns, 2025-08-18 The nineteenth volume of the Proceedings of the Society for Medieval Logic and Metaphysics honors the work of our president and founder Gyula Klima This volume of proceedings considers a host of issues relevant to key aspects of Klima's work from metaphysics to logic and epistemology Contributions include a new formalization that captures Ockham's semantics as a mathematical presheaf a response by the well known Ockhamist Claude Panaccio to objections raised by Klima to his work on intentionality a subtle and careful consideration of how genus and species are for Aquinas real accidents of being Gregory Doolan and a close look at Aristotle on demonstration by Lucas Angioni These papers add significant contributions to each of their major areas of exploration

Medieval Nonsense Jordan Kirk, 2021-05-04 Five hundred years before Jabberwocky and Tender Buttons writers were already preoccupied with the question of nonsense But even as the prevalence in medieval texts of gibberish babble birdsong and allusions to bare voice has come into view in recent years an impression persists that these phenomena are exceptions that prove the rule of the period's theologically motivated commitment to the kernel of meaning over and against the shell of the mere letter This book shows that to the contrary the foundational object of study of medieval linguistic thought was vox non significativa the utterance insofar as it means nothing whatsoever and that this fact was not lost on medieval writers of various kinds In a series of close and unorthodox readings of works by Priscian Boethius Augustine Walter Burley Geoffrey Chaucer and the anonymous authors of the Cloud of Unknowing and St Erkenwald it inquires into the way that a number of fourteenth century writers recognized possibilities inherent in the accounts of language transmitted to them from antiquity and transformed those accounts into new ideas forms and practices of non signification Retrieving a premodern hermeneutics of obscurity in order to provide materials for an archeology of the category of the literary Medieval Nonsense shows how these medieval linguistic textbooks mystical treatises and poems were engineered in such a way as to arrest the faculty of interpretation and force it to focus on the extinguishing of sense that occurs in the encounter with language itself

Encyclopedia of Medieval Philosophy Henrik Lagerlund, 2010-12-07 This is the first reference ever devoted to medieval philosophy It covers all areas of the field from 500 1500 including philosophers philosophies key terms and concepts It also provides analyses of particular theories plus cultural and social contexts

Rivista di Estetica 84 AA.VV., 2024-01-24 Although in social ontology the nature of money has been extensively studied little has been said about the nature of other entities populating the financial world such as debts economic exchanges and price drops This special issue of Rivista di Estetica gathers novel research papers dealing precisely with some ontological problems pertaining to the finance landscape While these papers do not exhaust the issues associated with the ontology of finance they certainly contribute to improving our comprehension of

the financial world which is crucial for both theoretical and practical reasons *History of Italian Philosophy* Eugenio Garin, 2008-01-01 This book is a treasure house of Italian philosophy Narrating and explaining the history of Italian philosophers from the Middle Ages to the twentieth century the author identifies the specificity peculiarity originality and novelty of Italian philosophical thought in the men and women of the Renaissance The vast intellectual output of the Renaissance can be traced back to a single philosophical stream beginning in Florence and fed by numerous converging human factors This work offers historians and philosophers a vast survey and penetrating analysis of an intellectual tradition which has heretofore remained virtually unknown to the Anglophonic world of scholarship
