The Oxford Handbook of Stress, Health, and Coping Susan Folkman Ph.D., 2010-11-30 Few publications have changed the landscape of contemporary psychology more than Richard Lazarus and Susan Folkman's landmark work *Stress Appraisal and Coping*. Its publication in 1984 set the course for years of research on the dynamic processes of psychological stress and coping in human beings. Now more than a quarter century later *The Oxford Handbook of Stress Health and Coping* pushes the field even further with a comprehensive overview of the newest and best work in this dynamic subject. Edited by Susan Folkman and comprising chapters by the field's leading scientists, this new volume details the expanded knowledge base that has emerged from extensive research on stress and coping processes over the last several decades. Featuring 22 topic-based chapters, including two by Folkman, this volume offers unprecedented coverage of the two primary research topics related to stress and coping: mitigating stress-related harms and sustaining well-being in the face of stress. Both topics are addressed within their relevant contexts, including chronic illness, calamity, bereavement, and social hardship. *The Oxford Handbook of Stress Health and Coping* is an essential reference work for students, practitioners, and researchers across the fields of health psychology, medicine, and palliative care.

Sense, Reference, and Philosophy Jerrold J. Katz, 2004-01-01 *Sense Reference and Philosophy* develops the far-reaching consequences for philosophy of adopting non-Fregean intensionalism, showing that long-standing problems in the philosophy of language and indeed other areas that appeared intractable can now be solved. Katz proceeds to examine some of those problems in this new light, including the problem of names, natural kind terms, the Liar Paradox, the distinction between logical and extra-logical vocabulary, and the Raven paradox. In each case, a non-Fregean intensionalism provides a philosophically more satisfying solution.

In subsequent chapters, Smith covers Husserl's logic, metaphysics, realism, and transcendental idealism, epistemology, and meta-ethics. Finally, the author assesses the significance and implications of Husserl's work for contemporary philosophy of mind and cognitive science. Meaning and Reading Michel

Meyer, 1983-01-01 According to the traditional view meaning presents itself under the form of some kind of identity To give the meaning of a sentence amounts to being capable of producing some substitute based on the identity of the terms of the sentence Is then the meaning of a book or of any text the capacity of rewriting it Instead of retaining a double standard theory of meaning one for sentences and another for texts that would allow for an ad hoc gap the author provides a unified conception called the question view of language he has developed known as problematology He pursues a systematic analysis of questioning in literature and shows how questioning makes the understanding process possible
