The Aboriginal Story:

The Aboriginal Story Ruth C. Williams, 1967 The Aboriginal Story of Burke and Wills Ian Clark, Fred Cahir, 2013-07-22

The Aboriginal Story of Burke and Wills is the first major study of Aboriginal associations with the Burke and Wills expedition of 1860-61. A main theme of the book is the contrast between the skills, perceptions and knowledge of the Indigenous people and those of the new arrivals and the extent to which this affected the outcome of the expedition. The book offers a reinterpretation of the literature surrounding Burke and Wills using official correspondence, expedition journals and diaries, visual art and archaeological and linguistic research and then complements this with references to Aboriginal oral histories and social memory. It highlights the interaction of expedition members with Aboriginal people and their subsequent contribution to Aboriginal studies. The book also considers contemporary and multi-disciplinary critiques that the expedition members were on the whole deficient in bush craft, especially in light of the expedition's failure to use Aboriginal guides in any systematic way. Generously illustrated with historical photographs and line drawings, The Aboriginal Story of Burke and Wills is an important resource for Indigenous people, Burke and Wills history enthusiasts and the wider community. This book is the outcome of an Australian Research Council project.

The Aboriginal Story, 1957 *The Story of Australia* Louise Johnson, Tanja Luckins, David Walker, 2021-09-02

The Story of Australia provides a fresh, engaging and comprehensive introduction to Australia's history and geography. An island continent with distinct physical features, Australia is home to the most enduring Indigenous cultures on the planet. In the late eighteenth century, newcomers from distant worlds brought great change. Since that time, Australia has been shaped by many peoples with competing visions of what the future might hold. This new history of Australia integrates a rich body of scholarship from many disciplines, drawing upon maps, novels, poetry, art, music, diaries and letters, government and scientific reports, newspapers, architecture and the land itself, engaging with Australia in its historical, geographical, national and global contexts. It pays particular attention to women and Indigenous Australians as well as exploring key themes including invasion, colonisation, land use, urbanisation, war, migration, suburbia and social movements for change. Elegantly written, readers will enjoy Australia's story from its origins to the present as the nation seeks to resolve tensions between Indigenous dispossession, British tradition and multicultural diversity while finding its place in an Asian region and dealing with global challenges like climate change. It is an ideal text for students, academics and general readers with an interest in Australian history, geography, politics and culture.

Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin, 1997-07-31

The Encyclopaedia fills a gap in both the history of science and in cultural studies. Reference works on other cultures tend either to omit science completely or pay little attention to it, and those on the history of science almost always start with the Greeks, with perhaps a mention of the Islamic world as a translator of Greek scientific works. The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures' science. Our aim is not to claim

the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi PERSONAL NOTE FROM THE EDITOR Many years ago I taught African history at a secondary school in Central Africa

Science-Fiction Rebels: The Story of the Science-Fiction Magazines from 1981 to 1990 Mike Ashley, 2016-01-28 Fourth volume in Mike Ashley's acclaimed set on the history of science fiction magazines This volume looks at the 1980s

Tsunami Edward Bryant, 2008-01-29 Tsunamis are underrated as major hazards mainly due to the misconceptions that they occur infrequently and happen along some distant shoreline However evidence for past great tsunami has recently been discovered along apparently aseismic and protected coastlines such as those of Australia and Western Europe This is a comprehensive and well illustrated textbook on all aspects of tsunami It can be used by a student or layperson to gain encyclopedic knowledge about tsunami The Story of Astronomy Heather Couper, Nigel Henbest, 2011-12-05 Journey through time and space with the greatest astronomers in history Astronomy is one of the oldest of all the sciences And yet its history is also so much more than the history of a science reflecting our entire culture and providing insight into the evolution of humankind's ideas and ideals over the centuries This fascinating book tells the amazing story of the development of astronomy through the key characters in its history from Copernicus to Hubble and Halley the excitement of new discoveries and the ways in which the history of the skies has affected our lives and how we look at the planet on which we live The Story of Astronomy celebrates changing perspectives from the Ancient Greeks to the latest scientific advances as different cultures philosophers and scientists sought to come to terms with their and earth's place in the Cosmos Exhaustively researched and containing interviews with many of the world's leading astronomers including Stephen Hawking this is the ultimate history of how the universe has revealed itself to us over the millennia

The History of the Science-fiction Magazine Michael Ashley, 2000 Fourth volume in Mike Ashley's acclaimed set on the history of science fiction magazines This volume looks at the 1980s Geographic Thought Tim Cresswell, 2024-02-05 An accessible and

The Australian Country Girl: History, Image, Experience Catherine Driscoll, 2016-03-23 The Australian Country Girl History Image Experience offers a detailed analysis of the experience and the image of Australian country girlhood In Australia country girl names a field of experiences and life stories by girls and women who have grown up outside of the demographically dominant urban centres But it also names a set of ideas about Australia that is surprisingly consistent across the long twentieth century despite also working as an index of changing times For a long period in Australian history well before Federation and long after it public and popular culture openly equated Australian character with rural life This image of Australian-ness sometimes went by the name of the bush man now a staple of Australian history This has been counterbalanced post World War II and increased immigration by an image of sophisticated Australian modernity located in multicultural cities These images of Australia balance rather than contradict one another in many ways and the more cosmopolitan image of Australia is often in dialogue with that preceding image of the bush This book does not offer a corrective to the story of Australian national identity but rather a fresh perspective on this history and a new focus on the ever changing experience of Australian rural life It argues that the country

girl has not only been a long standing counterpart to the Australian bush man she has more importantly figured as a point of dialogue between the country and the city for popular culture and for public sphere narratives about Australian society and identity *Working Two Way* Michelle Johnston, Simon Forrest, 2020-06-15 This book describes an action research approach to engaging respectfully with First Nations communities in a diverse range of contexts disciplines and projects It offers a valuable guide for professionals students and teaching staff that recognises all participants as equal partners while acknowledging the diversity of First Peoples and culture and prioritising local knowledge While the book is adaptable to a diverse range of cultures and disciplines it is specifically focused on cross cultural collaborative case studies in Noongar Country which is located in the southwest of Western Australia The case studies demonstrate how action research can be applied not only in the traditional areas of education and social justice but also in a diverse range of disciplines communities and circumstances including media education environmental management and health The book s aim is to highlight successful cross cultural First Nations community projects and to discuss each one in terms of its action research philosophy and process In this regard the voices of the participants are prioritised especially those of First Nations communities While this book is specifically pitched at Australian readers the action research approach described may be adapted and applied to many cross cultural collaborative relationships making it of interest and value to international students and researchers

Living Indigenous Archives Kirsten Thorpe, 2025-11-06 Living Indigenous Archives invites readers to consider new pathways for developing and sustaining archival landscapes that are embedded with respect for Indigenous worldviews and cultural flows of knowledge Drawing on First Nations experiences in Australia the book considers the need to reframe archives in order to rebalance power and restore dignity to the Aboriginal and Torres Strait Islander people captured in the archives Contributing to research on the contested nature of archives and the need for archival decolonisation the book examines whether current dominant approaches to archiving and managing Aboriginal and Torres Strait Islander knowledges support Indigenous people s wellbeing and recognize Indigenous sovereignty in an archival context Drawing on autoethnographical research and a series of yarning sessions with First Nations people the book shares a number of case studies that discuss themes related to Indigenous archiving These include community engagement approaches to facilitate reciprocal relationships and counter storytelling archival reparations enacting protocols to support archives spiritual and emotional care and the support for Indigenous language revitalization in archives Living Indigenous Archives highlights the need for Indigenous reclamation of archives and the dismantling of colonial archiving models that are harmful to Indigenous people s wellbeing The book s theoretical and practical underpinnings will be relevant to academics and students working in archival studies as well as those engaged in the study of library and information science Indigenous peoples and history
