The 1826 Journal of John James Audubon John James Audubon, Alice Ford, 1967 **John James Audubon's Journal Of 1826** John James Audubon, 2011-07-01 John James Audubon an early American naturalist and painter produced one of the greatest works of natural history and art of the nineteenth century *The Birds of America* As the record of the interior story of the making of this monumental work his journal of 1826 is one of the richest documents in the history of American culture The first accurate transcription of Audubon's 1826 journal this edition corrects many of the errors both intentional and unintentional found in previous editions Such errors have obscured the figure of Audubon as a man struggling to realize his professional and artistic dreams When Audubon embarked for Liverpool from New Orleans in 1826 he carried with him more than 250 of his watercolor drawings in a heavy case a packet of letters of introduction and many a good reason to believe that he was a fool to be gambling his family's fortunes on so risky and grandiose a venture These journal entries conveying with energy and emotion Audubon's experience of risking everything on a dream Oh America Wife Children and acquaintances Farewell document an American icon's transformation from a beleaguered backwoods artist and naturalist to the man who would become America's premier ornithologist illustrator of birds and nature essayist **The 1826 Journal of John James Audubon** John James Audubon, Alice Ford, 1987 *The 1826 Journal of John James Audubon. [Illustr.]** John James Audubon, 1967 **John James Audubon Journal of 1826** John James Audubon, 1826 This journal describes Audubon's successful voyage to England and Scotland in 1826 to seek publication of *The Birds of America* The 1826 Journal John James Audubon, 1967 **The Eighteen Twenty-Six Journal of John James Audubon** John James Audubon, Alice Ford, 1967 John James Audubon Gregory Nobles, 2017-03-07 John James Audubon's *The Birds of America* stands as an unparalleled achievement in American art a huge book that puts nature dramatically on the page With that work Audubon became one of the most adulated artists of his time and America's first celebrity scientist In this fresh approach to Audubon's art and science Gregory Nobles shows us that Audubon's greatest creation was himself A self-made man incessantly striving to secure his place in American society Audubon made himself into a skilled painter a successful entrepreneur and a prolific writer whose words went well beyond birds and scientific description He sought status with the gentlemen of science on both sides of the Atlantic but he also embraced the ornithology of ordinary people In pursuit of popular acclaim in art and science Audubon crafted an expressive audacious and decidedly masculine identity as the American Woodsman a larger than life symbol of the new nation a role he perfected in his quest for transatlantic fame Audubon didn't just live his life he performed it In exploring that performance

Nobles pays special attention to Audubon's stories some of which the murky circumstances of his birth a Kentucky hunting trip with Daniel Boone an armed encounter with a runaway slave Audubon embellished with evasions and outright lies Nobles argues that we cannot take all of Audubon's stories literally but we must take them seriously By doing so we come to terms with the central irony of Audubon's true nature the man who took so much time and trouble to depict birds so accurately left us a bold but deceptive picture of himself *The Eighteen Hundred Twenty-Six Journals of John James Audubon* John James Audubon,1967-01-01 *The Poetics of Natural History* Christoph Irmscher,2019-09-08 Newly expanded and in full color this groundbreaking book argues that early American natural historians had a distinctly poetic sensibility producing work that had a visionary intensity Covering naturalists from John James Audubon to PT Barnum it considers not only natural history writing but also illustrations photographs and actual collections of flora and fauna Photography and all associated expenses made possible by a generous grant from Furthermore a program of the J M Kaplan Fund **John James Audubon** Richard Rhodes,2006-04-11 John James Audubon came to America as a dapper eighteen year old eager to make his fortune He had a talent for drawing and an interest in birds and he would spend the next thirty five years traveling to the remotest regions of his new country often alone and on foot to render his avian subjects on paper The works of art he created gave the world its idea of America They gave America its idea of itself Here Richard Rhodes vividly depicts Audubon's life and career his epic wanderings his quest to portray birds in a lifelike way his long anguished separations from his adored wife his ambivalent witness to the vanishing of the wilderness John James Audubon The Making of an American is a magnificent achievement *Early American Nature Writers* Daniel Patterson,2007-11-30 At a time when the environment is of growing concern to students and general readers nature writing is especially meaningful This book profiles the literary careers of 52 early American nature writers such as John James Audubon Ralph Waldo Emerson Caroline Stansbury Kirkland Thomas Jefferson Henry David Thoreau and Mabel Osgood Wright Each entry is written by an expert contributor and discusses the writer's life and works Entries close with primary and secondary bibliographies and the encyclopedia ends with suggestions for further reading Global warming pollution and other issues have made the environment a topic of constant discussion these days Many environmental concerns were treated by early American nature writers who recognized the beauty of the natural world in an age of commercial expansion Some of the most famous writers of the 18th and 19th centuries wrote about nature and their works are stylistic masterpieces At a time when students are being encouraged to read and write about nonfiction these masterworks of early American nature writing are all the more important This book gives students and general readers a welcome introduction to early American nature writers **A Measure of Perfection** Charles Colbert,1997 Despite its widespread popularity in antebellum America phrenology has rarely been taken seriously as a cultural phenomenon Charles Colbert seeks to redress this neglect by demonstrating the important contributions the theory made to artistic developmen *The Papers of Henry Clay* Henry Clay,2015-02-05 This

Roscoe and Italy Stella Fletcher, 2016-04-08 Anglo Italian cultural connections in the eighteenth and nineteenth centuries have been the subject of numerous studies in recent decades Within that wider body of literature there has been a growing emphasis on appreciation of the history and culture of Renaissance Italy especially in nineteenth century Britain In 1954 J R Hale s *England and the Italian Renaissance* was a pioneering account of the subject followed in 1992 by Hilary Fraser s monograph *The Victorians and Renaissance Italy* and in 2005 by *Victorian and Edwardian Responses to the Italian Renaissance* edited by John E Law and Lene stermark Johansen There is however an obvious gap in the literature concerning the pivotal figure of William Roscoe 1753 1831 the first English language biographer of Lorenzo de Medici and of Pope Leo X The *Life of Lorenzo de Medici* called the Magnificent proved to be so popular as to prompt the claim that Roscoe effectively invented the Italian Renaissance as it has become understood by subsequent generations of readers in the English speaking world This collection of ten essays redresses the balance by examining Roscoe as biographer as a connoisseur of Italian literature and as a collector of Italian works of art
