The 1996 United States Model Income Tax Convention analysis Commentary And Comparison:

The 1996 United States Model Income Tax Convention: Analysis, Commentary and Comparison Richard Doernberg, Cornelis Raad, 1997-02-27 This book is an analysis of the 1996 United States US Model focusing on a comparison with both the 1981 US Model and the 1995 OECD Model The analysis of each treaty article in the US Model begins with a side by side comparison of the 1996 US Model the 1981 US Model and the 1995 OECD Model Then each paragraph of the 1996 US Model is analysed in comparison to the other Model treaties and in the light of treaty policy in general *Judicial Interpretation of Tax Treaties* Carlo Garbarino, 2016-10-28 *Judicial Interpretation of Tax Treaties* is a detailed analytical guide to the interpretation of tax treaties at the national level The book focuses on how domestic courts interpret and apply the OECD Commentary to OECD Model Tax Convention on Income and on Capital Adopting a global perspective the book gives a systematic presentation of the main interpretive proposals put forward by the OECD Commentary and analyses selected cases decided in domestic tax systems in order to assess whether and how such solutions are adopted through national judicial process and indeed which of these are of most practical value The book operates on two levels firstly it sets out a clear and comprehensive framework of tax treaty law which will be an important tool for any tax practitioner Secondly the book provides crucial guidance on issues of tax treaty law as applied at domestic level such as investment or business income dispute resolution and administrative cooperation *Taxing Income and Consumption* Kerrie Sadiq, Chris Evans, Na Li, 2025-05-14 This incisive book presents a critical analysis of contemporary issues in international taxation considering the long standing question of how best to tax income and consumption Leading experts from across the globe explore the future of tax in a changing world promoting a re examination of fundamental issues in tax law and policy *The Impact of Community Law on Tax Treaties: Issues and Solutions* Pasquale Pistone, 2002-03-11 Study on the question of harmonization of direct taxation among European Community Member States how Member States must comply with EC Law as they apply their tax treaties how EC law regulates cross border tax issues within the Community and how EC law affects tax treaties between EU Member States and third countries The book provides expert commentary on 27 leading tax cases from the European Court of Justice and gives the proposal of EC Model Tax Convention which combines existing provisions of international tax law with the principles of Community tax law "Taxes Covered" Patricia Brandstetter, 2011 This book provides an in depth analysis of recent case law and academic literature and sheds light on the background to the standard formulations used in the provision on the substantive scope of today s tax treaties Why this book The substantive scope of a tax treaty determines the extent of protection it can provide against international double taxation Countries worldwide have adopted the text of Art 2 Taxes covered of the OECD Model Tax Conventions in their bilateral tax treaties However the structure and wording of Art 2 which have remained virtually unchanged since the beginnings of tax treaty law in the 1920s create interpretive issues and uncertainties in practical treaty application This book not only provides an in depth analysis of

recent case law and academic literature but also sheds light on the background to the standard formulations so widely used in the provision on the substantive scope of today's tax treaties. The source documents used have rarely found their way into publications before historical OEEC and OECD Reports and Minutes originally largely classified as restricted and thus inaccessible to the public for decades provide an insight into the drafting process of Art 2 and the discussions of Delegates from various nations on practical implications for treaty application. The book offers a unique perspective on this core treaty provision and aims to provide guidance for determining the taxes covered in any tax treaty.

The International Tax Law Concept of Dividend Marjaana Helminen, 2017-05-02. The distribution of profits between corporations resident in different jurisdictions gives rise to both significant tax planning opportunities and tax risks. As cross border transactions between corporations grow in number and complexity the question of how a profit distribution is classified for corporate income tax purposes becomes increasingly important particularly in the context of issues such as double taxation, non taxation and tax neutrality. The OECD BEPS project has only increased the relevance. This unique work discusses the international tax law rules determining which transactions may be classified and taxed as dividends and how possible classification conflicts may be resolved. The author examines the tax classification of various inter corporate transactions including Payments made under dividend stripping arrangements, Fictitious profit distributions, Economic benefits in the context of transfer pricing, Returns on debt equity hybrids, Interest payments in thin capitalization situations and distributions following liquidation. The analysis of each transaction refers to international tax law. Most weight is given to tax treaties and EU tax law including the BEPS development. The approaches adopted in different states national tax law are covered by a more general analysis. The comprehensive coverage and the practical nature of *The International Tax Law Concept of Dividend* make it an essential acquisition for tax practitioners, researchers and tax libraries worldwide.

WTO and Direct Taxation Michael Lang, Judith Herdin, Ines Hofbauer, 2005-01-01. WTO Law and Direct Taxation are linked in numerous ways. The WTO Agreements thereof especially the GATT and GATS Agreements contain several explicit provisions on the subject of direct taxes or even on its delimitation from Tax Treaty Law. To some extent the scope of application of WTO Law has been broadened by case law to comprise also direct taxes. This entails overlappings particularly with regard to the law of subsidies, prohibitions of discrimination and most favoured nation obligations. This book highlights increasingly relevant interdependencies between WTO Law and Direct Taxation from the viewpoint of 21 States. Special emphasis is placed on the conformity of national taxes on profits with WTO Law as well as on specifics of interpretation in several Member States. 21 National Reports from nearly all EU countries as well as Colombia, Israel, New Zealand, Norway and the USA dealt with this topic and were compiled and published in this volume. Additionally a General Report prepared by Servatius van Thiel summarises the results of the National Reports. Moreover experts in this field joining the Conference among them Reuven Avi Yonah, Michael Lennard and Raymond Luja have volunteered contributions dealing with specific problems of WTO and Direct Taxation.
