Alligators of the North Harry Barrett, Clarence F. Coons, 2010-03-16 The Alligator was an amphibious machine designed and patented in Canada in the late 1880s This warping tug was capable of towing a log boom across a lake and then portaging itself to the next body of water Steam powered and rugged it was one of the pioneers in the mechanization of the forest industry and for more than thirty years was ubiquitous in northern Ontario until eclipsed by its worthy successor the Russel tug This long overdue book on the Alligator Warping Tug designed and built by West Peachey of Simcoe Ontario is a welcome addition to the libraries of those intrigued by Canada's story and particularly lumbering history R John Corby curator emeritus Canada Science and Technology Museum By enabling access to the upper reaches of the Ottawa River and its many tributaries the Alligator tug extended the social and economic stability provided by the timber industry and supported the populating of this vast region Alligators of the North is a wonderful touchstone for all who share this heritage Mary Campbell mayor of McNab Braeside Township Renfrew County

The Once and Future Great Lakes Country John L. Riley, 2013-10-01 North America's Great Lakes country has experienced centuries of upheaval Its landscapes are utterly changed from what they were five hundred years ago The region's superabundant fish and wildlife and its magnificent forests and prairies astonished European newcomers who called it an earthly paradise but then ushered in an era of disease warfare resource depletion and land development that transformed it forever The Once and Future Great Lakes Country is a history of environmental change in the Great Lakes region looking as far back as the last ice age and also reflecting on modern trajectories of change many of them positive John Riley chronicles how the region serves as a continental crossroads one that experienced massive declines in its wildlife and native plants in the centuries after European contact and has begun to see increased nature protection and rewilding in recent decades Yet climate change globalization invasive species and urban sprawl are today exerting new pressures on the region's ecology Covering a vast geography encompassing two Canadian provinces and nine American states The Once and Future Great Lakes Country provides both a detailed ecological history and a broad panorama of this vast region It blends the voices of early visitors with the hopes of citizens now

Full of Hope and Promise Eric Ross, 1991 One hundred and fifty years ago on the 10th of February 1841 Upper and Lower Canada present day Ontario and Quebec united to form the Province of Canada In Full of Hope and Promise Eric Ross paints a vivid picture of everyday life in the Canadas during this portentous year
