## **The Absent Mind:**

The Absent-minded Imperialists Bernard Porter, 2004 The British empire was a huge enterprise To foreigners it more or less defined Britain in the nineteenth and early twentieth centuries Its repercussions in the wider world are still with us today It also had a great impact on Britain herself for example on her economy security population and eating habits One might expect this to have been reflected in her society and culture Indeed this has now become the conventional wisdom that Britain was steeped in imperialism domestically which affected or infected almost everything Britons thought felt and did This is the first book to examine this assumption critically against the broader background of contemporary British society Bernard Porter a leading imperial historian argues that the empire had a far lower profile in Britain than it did abroad Many Britons could hardly have been aware of it for most of the nineteenth century and only a small number was in any way committed to it Between these extremes opinions differed widely over what was even meant by the empire This depended largely on class and even when people were aware of the empire it had no appreciable impact on their thinking about anything else Indeed the influence far more often went the other way with perceptions of the empire being affected or distorted by more powerful domestic discourses Although Britain was an imperial nation in this period she was never a genuine imperial society As well as showing how this was possible Porter also discusses the implications of this attitude for Britain and her empire and for the relationship between culture and imperialism more generally bringing his study up to date by including the case of the present day USA *The Absent-minded Bridegroom* Larry Edward Johnson, 1926

**Absent-minded?** J. T. Reason, Klara Mycielska, 1982 *The Absent Mind* Tracy Kimble Gore, 1975 **Reading Popular Physics** Elizabeth Leane, 2017-03-02 Reading Popular Physics is a valuable contribution to our understanding of the nature and implications of physics popularizations A literary critic trained in science Elizabeth Leane treats popular science writing as a distinct and significant genre focusing particularly on five bestselling books Stephen Hawking's *A Brief History of Time* Steven Weinberg's *The First Three Minutes* James Gleick's *Chaos* M Mitchell Waldrop's *Complexity* and Gary Zukav's *The Dancing Wu Li Masters* Leane situates her examination of the texts within the heated interdisciplinary exchanges known as the Science Wars focusing specifically on the disputed issue of the role of language in science Her use of literary analysis reveals how popular science books function as sites for disciplinary skirmishes as she uncovers the ways in which popularizers of science influence the public In addition to their explicit discussion of scientific concepts Leane argues these authors employ subtle textual strategies that encode claims about the nature and status of scientific knowledge claims that are all the more powerful because they are unacknowledged Her book will change the way these texts are read offering readers a fresh perspective on this highly visible and influential genre **Mind and Supermind** Keith Frankish, 2007-07-26 *Mind and Supermind* offers an alternative perspective on the nature of belief and the structure of the human mind Keith Frankish argues that the folk psychological term belief refers to two distinct types of mental state which have different

properties and support different kinds of mental explanation Building on this claim he develops a picture of the human mind as a two level structure consisting of a basic mind and a supermind and shows how the resulting account sheds light on a number of puzzling phenomena and helps to vindicate folk psychology Topics discussed include the function of conscious thought the cognitive role of natural language the relation between partial and flat out belief the possibility of active belief formation and the nature of akrasia self deception and first person authority This book will be valuable for philosophers psychologists and cognitive scientists

**Slips of the Mind** Jennifer Soong,2025-04-07 An audacious account of what happens when forgetting becomes a way of writing and writing becomes a way of forgetting In *Slips of the Mind* poet and critic Jennifer Soong turns away from forgetting's long standing associations with suppression privation and error to argue that the absence or failure of memory has often functioned as a generative creative principle Exploring forgetting not as the mere rejection of a literary past or a form of negative poetics Soong puts to the test its very aesthetic meaning What new structures forms of desires styles and long and short feelings do lapses in time allow What is oblivion's relationship to composition And how does the twentieth century poet come to figure as the quintessential embodiment of such questions Soong uncovers forgetting's influence on Gertrude Stein Lyn Hejinian Tan Lin Harryette Mullen Lissa Wolsak and New York School poets John Ashbery James Schuyler Bernadette Mayer and Ted Berrigan among others She reveals that forgetting's shapeshifting produces differences in poetic genre interest and degrees of intentionality and that such malleability is part of forgetting's nature Most provocatively Soong shows how losing track of things leaving them behind or finding them already gone resists overdetermination and causality in the name of surprise as poets leverage forgetting in order to replace identity with style *Slips of the Mind* is the kind of literary criticism that will reward all readers of modern and contemporary poetry
