

SMUT AN ANATOMY OF DIRT

**CHRISTIAN
ENZENSBERGER**

Clean is well and good. Clean is cheerful proper nice. Clean is above and here. Dirty is ugly and elsewhere. Clean is obviously the answer, dirty is underneath and evil, dirty is pointless. Clean is right. Against this dirty is... clean after all is... dirty is... how can one describe it... dirty is somehow unclear, dirty is by and large, clean at least is, but dirty now that is real.

Invented by Canadians 1 Processed Cheese J L Kraft grew up on a dairy farm in Stevensville Ontario While working as a grocer he was struck by the amount of cheese that was wasted on wheels of cheddar when the dried rind was scraped off to get at the fresh interior He resolved to find a way to use this waste product experimenting with double boilers preservatives and cheddar Eventually he found a way of stabilizing the dairy product that has come to be known as processed cheese 2 Frozen Foods The technology to freeze food quickly and transport it to markets far away was developed in Halifax in 1928 Within a year ice fillets were being sold to fish deprived Torontonians who loved the taste and didn't seem to mind the high price tag Despite this the fishing industry and private companies lost interest and quickly mothballed the project In 1930 a feisty American Colonel Clarence Birdseye claimed responsibility for developing frozen foods and promptly made a fortune 3 Pablum Invented in 1930 by Dr Alan Brown assisted by researchers Theodore Drake and Fred Tisdall The add water baby cereal revolutionized infant nutrition and of course became synonymous with food that was bland and mushy 4 Poutine Although many claim responsibility for the crowd pleasing combination of squeaky cheese curds canned gravy and french fries it is generally agreed that the first order of this regional specialty of Quebec was served up by restaurant owner Fernand Lachance in 1957 Many variations on the original recipe exist including one deluxe version with foie gras served in Montreal's Pied de Cochon bistro

On Being Blue William H. Gass, 2014-03-11 On Being Blue is a book about everything blue sex and sleaze and sadness among other things and about everything else It brings us the world in a word as only William H Gass among contemporary American writers can do Gass writes Of the colors blue and green have the greatest emotional range Sad reds and melancholy yellows are difficult to turn up Among the ancient elements blue occurs everywhere in ice and water in the flame as purely as in the flower overhead and inside caves covering fruit and oozing out of clay Although green enlivens the earth and mixes in the ocean and we find it copperish in fire green air green skies are rare Gray and brown are widely distributed but there are no joyful swatches of either or any of exuberant black sullen pink or acquiescent orange Blue is therefore most suitable as the color of interior life Whether slick light sharp high bright thin quick sour new and cool or low deep sweet dark soft slow smooth heavy old and warm blue moves easily among them all and all profoundly qualify our states of feeling

Rise and Shine Simon Carter, 2007-06-15 Sunshine plays an important role in all aspects of life but there has been little social analysis of the sun and its place in our world Recently experts have warned us that the sun's rays are dangerous Yet the sun tan can still be taken as a sign of health How did we arrive at this ambivalent relationship to the sun and what does this say about our changing attitudes to the human body and environment Rise and Shine takes as its starting point a view of sunlight as part of our material and social culture How did the use of sunlight to treat TB and rickets in the early twentieth century alter our relationship to the sun When was sun tan lotion invented By drawing on a range of archive and historical sources Rise and Shine traces the network of social and medical forces that constitute our current sometimes problematic relationship with sun and sunlight
